Confronting the Challenges of Urbanization in China Zai Liang, Steven F. Messner, Youqin Huang, Cheng Chen, 2016-08-05 Since the late 1970s China has experienced an unprecedented pace of urbanization In 1978 only 17 8% of the population resided in urban areas but by 2013 the level of urbanization had reached 53 8% During the same period China also enjoyed spectacular economic growth China had become the second largest economy in the world by 2012 just behind the United States Despite China s highly acclaimed achievements in urbanization and its economic miracle urban China confronts a set of significant challenges This book provides theoretically informed and empirically rich analyses of some of the key challenges facing China s urbanization The first part deals with new patterns of urbanization focusing on

comprehensive measures and environmental dimensions of urbanization The second part of the book focuses on several aspects related to migrants in cities migrant entrepreneurship return migration and local people s attitudes toward migrants The final section examines two key issues important for migrants urban local residents and policy makers that have become quite contentious in China today housing and urban health care This collection presents original cutting edge research on some of the most pressing challenges confronting contemporary urban China conducted by researchers from multiple social science disciplines It will appeal to scholars and advanced students of urban studies and China studies as well as those in sociology anthropology geography and political science *Dialogues in Urban Planning* Tony Gilmour,Edward J.

Blakely,Rafael E. Pizarro,2008-12-10 In an age when the buzzword is sustainability why do we continue to build unsustainable cities and regions Are there alternatives to car clogged streets sterile suburban McMansions and a degraded natural environment This book brings planners back to the centre of the debate It shows that sustainability can no longer just apply to the sub field of planning called environmental planning but has to permeate all aspects housing economic development transport regional coordination and urban design Showcasing cutting edge research from academics and doctoral research candidates at the University of Sydney this latest edition of the *Dialogues in Urban Planning* series is recommended reading for professional planners students and policy makers We need to find a way to make our regions sustainable for this generation and for generations to come *Encyclopedia of Immigrant Health* Sana Loue,Martha Sajatovic,2014-06-20 There is increasing interest in the scientific literature on immigrant health and its impact on disease transmission disease prevention health promotion well being on an individual and population level health policy and the cost of managing all these issues on an individual institutional national and global level The need for accurate and up to date information is particularly acute due to the increasing numbers of immigrants and refugees worldwide as the result of natural disasters political turmoil the growing numbers of immigrants to magnet countries and the increasing costs of associated health care that are being felt by governments around the world Format and Scope The first portion of the encyclopedia contains chapters that are approximately 25 to 40 manuscript pages in length Each overview chapter includes a list of references and suggested readings for cross referencing within the encyclopedia The opening chapters are Immigration in the Global Context Immigration Processes and Health in the U S A Brief History Alternative and Complementary Medicine Culture Specific Diagnoses Health Determinants Occupational and Environmental Health Methodological Issues in Immigrant Health Research Ethical Issues in Research with Immigrants and Refugees Ethical Issues in the Clinical Context The second portion of the book consists of alphabetical entries that relate to the health of immigrants Entries are interdisciplinary and are drawn from the following fields of study anthropology demographics history law linguistics medicine population studies psychology religion and sociology Each entry is followed by a listing of suggested readings and suggested resources and also links to related terms within the whole book Outstanding Features The book

adopts a biopsychosocial historical approach to the topics covered in the chapters and the entries Each entry includes suggested readings and suggested resources The chapters and entries are written graduate level that is accessible to all academics researchers and professionals from diverse backgrounds We consider the audience for the entries to be well educated but a non expert in this area The primary focus of the book is on the immigrant populations in and immigration to magnet countries References are made to worldwide trends and issues arising globally In addition to the comprehensive subject coverage the text also offers diverse perspectives The editors themselves reflect the multidisciplinary nature of the topics with expertise in psychiatry law epidemiology anthropology and social work Authors similarly reflect diverse disciplines

The Urban Struggle for Economic, Environmental and Social Justice Malo André Hutson, 2015-11-19 This book discusses the current demographic shifts of blacks Latinos and other people of colour out of certain strong market cities and the growing fear of displacement among low income urban residents It documents these populations efforts to remain in their communities and highlights how this leads to community organizing around economic environmental and social justice The book shows how residents of once neglected urban communities are standing up to city economic development agencies influential real estate developers universities and others to remain in their neighbourhoods protect their interests and transform their communities into sustainable healthy communities These communities are deploying new strategies that build off of past struggles over urban renewal Based on seven years of research this book draws on a wealth of material to conduct a case study analysis of eight low income mixed income communities in Boston New York San Francisco and Washington DC This timely book is aimed at researchers and postgraduate students interested in urban policy and politics community development urban studies environmental justice urban public health sociology community based research methods and urban planning theory and practice It will also be of interest to policy makers community activists and the private sector

Depression in Parents, Parenting, and Children Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Depression, Parenting Practices, and the Healthy Development of Children, 2009-10-28 Depression is a widespread condition affecting approximately 7.5 million parents in the U.S each year and may be putting at least 15 million children at risk for adverse health outcomes Based on evidentiary studies major depression in either parent can interfere with parenting quality and increase the risk of children developing mental behavioral and social problems Depression in Parents Parenting and Children highlights disparities in the prevalence identification treatment and prevention of parental depression among different sociodemographic populations It also outlines strategies for effective intervention and identifies the need for a more interdisciplinary approach that takes biological psychological behavioral interpersonal and social contexts into consideration A major challenge to the effective management of parental depression is developing a treatment and prevention strategy that can be introduced within a two generation framework conducive for parents and their children Thus far both the federal and

state response to the problem has been fragmented poorly funded and lacking proper oversight This study examines options for widespread implementation of best practices as well as strategies that can be effective in diverse service settings for diverse populations of children and their families The delivery of adequate screening and successful detection and treatment of a depressive illness and prevention of its effects on parenting and the health of children is a formidable challenge to modern health care systems This study offers seven solid recommendations designed to increase awareness about and remove barriers to care for both the depressed adult and prevention of effects in the child The report will be of particular interest to federal health officers mental and behavioral health providers in diverse parts of health care delivery systems health policy staff state legislators and the general public

Toward the Healthy City Jason Corburn,2009 A call to reconnect the fields of urban planning and public health that offers a new decision making framework for healthy city planning

Urban Health Sandro Galea,Catherine K. Ettman,David Vlahov,2019-04-04 An essential collection that advances our understanding of how cities influence our health More than half the world s population lives in cities a figure that will grow to two thirds by 2030 As global populations rapidly consolidate around urban centers the scientific understanding of what this means for human health faces a new and greater urgency Urban Health connects urban exposures the experiences choices and behaviors shaped by living in a city to their impact on population health By using the ubiquitous aspects of the urban experience as a lens to study these exposures across borders and demographics it offers a new scalable framework for understanding health and disease Its applications to public health epidemiology and social science are virtually unlimited Enriched with case studies that consider the state of health in cities all over the world this book does more than capture the state of a nascent field it holds a critical mirror to itself considering the next decade and arming a new generation with the tools for research and practice

Happy City: Transforming Our Lives Through Urban Design Charles Montgomery,2013-11-12 A journalist travels the world and investigates current socioeconomic theories of happiness to discover why most modern cities are designed to make us miserable what we can do to change this and why we have more to learn from poor cities than from prosperous ones

Geospatial Technologies for Urban Health Yongmei Lu,Eric Delmelle,2019-10-10 This volume presents a timely collection of research papers on the progress opportunities and challenges related to the advancement of geospatial technologies for applications in urban health research and management The chapter authors cover technologies ranging from traditional GIS and remote sensing technologies to recently developed tracking locational technologies and volunteered geographic information VGI In four main sections the book uniquely contributes to the conversation of how geospatial technologies and other GIScience research may be enhanced by addressing the data and challenges presented by urban health issues The book is intended for those with backgrounds in health and medical geography social epidemiology urban planning health management and lifestyle research The book starts with an introduction by the editors providing an overview of traditional and emerging geospatial technologies and how they each can

significantly contribute to urban health studies Section 1 covers urban health risk and disease and analyses the spatial and temporal patterns of selected urban health issues Section 2 addresses urban health service access and demonstrates how traditional and new geospatial technologies apply to different segments of urban populations facing varied challenges Section 3 focuses on incorporating geospatial technologies in promoting healthy behaviours and lifestyles in urban settings Section 4 assesses how geospatial technologies may be incorporated into urban health policies and management practices Adopting a forward looking perspective these papers examine the various health challenges in urban systems and explore how new and emerging geospatial technologies will need to develop to address these problems

Sexualities and Identities of Minority Women Sana Loue, 2009-08-11 The concept for this book came about following the publication of the volume *Health Issues Confronting Minority Men Who Have Sex with Men* published by Springer in 2008 Consistent with its title that work focused on specific health issues identified by communities researchers and AIDS service providers that were and continue to be of concern During the preparation of that volume I received numerous telephone calls and e mails from women in various parts of the country asking why a book was not also being developed to address their often neglected concerns Accordingly the topics addressed in *Identities and Sexualities of Minority Women* were developed based on input from minority women who participated in focus groups conducted in diverse regions of the United States These focus groups were held specifically to provide an opportunity for sexual minority women in minority communities to identify those issues that from their perspective are most salient and relevant to their lives It is not surprising in view of the variation in process by which the topics were identified as well as the differences in perspective associated with differences in sex and gender that this resulting compilation of topics departs substantially from the focus of the companion text addressing health issues of minority men who have sex with men

Encyclopedia of Epidemiology Sarah Boslaugh, 2008 Presents information from the field of epidemiology in a less technical more accessible format Covers major topics in epidemiology from risk ratios to case control studies to mediating and moderating variables and more Relevant topics from related fields such as biostatistics and health economics are also included

Encyclopedia of Environmental Health, 2008-09-01 Environmental health has evolved over time into a complex multidisciplinary field Many of the key determinants and solutions to environmental health problems lie outside the direct realm of health and are strongly dependent on environmental changes water and sanitation industrial development education employment trade tourism agriculture urbanization energy housing and national security Environmental risks vulnerability and variability manifest themselves in different ways and at different time scales While there are shared global and transnational problems each community country or region faces its own unique environmental health problems the solution of which depends on circumstances surrounding the resources customs institutions values and environmental vulnerability This work contains critical reviews and assessments of environmental health practices and research that have worked in places and thus can guide programs and economic development in other countries or regions

The Encyclopedia of Environmental Health Five Volume Set seeks to conceptualize the subject more clearly to describe the best available scientific methods that can be used in characterizing and managing environmental health risks to extend the field of environmental health through new theoretical perspectives and heightened appreciation of social economic and political contexts and to encourage a richer analysis in the field through examples of diverse experiences in dealing with the health environment interface The Encyclopedia of Environmental Health contains numerous examples of policy options and environmental health practices that have worked and thus can guide programs in other countries or regions It includes a wide range of tools and strategies that can assist communities and countries in assessing environmental health conditions monitoring progress of intervention implementation and evaluating outcomes Provides a comprehensive overview of existing knowledge in this emerging field Articles contain summaries and assessments of environmental health practices and research providing a framework for further research Places environmental health in the broader context of environmental change and related ecological political economic social and cultural issues

Women and Addiction Kathleen T. Brady, Sudie E. Back, Shelly F. Greenfield, 2009-04-02 For many years addiction research focused almost exclusively on men Yet scientific awareness of sex and gender differences in substance use disorders has grown tremendously in recent decades This volume brings together leading authorities to review the state of the science and identify key directions for research and clinical practice Concise focused chapters illuminate how biological and psychosocial factors influence the etiology and epidemiology of substance use disorders in women their clinical presentation course and psychiatric comorbidities treatment access and treatment effectiveness Prevalent substances of abuse are examined as are issues facing special populations
