It's the way Leslie Blauman translates each and every standard for reading, writing, speaking, and listening language and foundational skills into the day to day what you do. It's all here. The standards for literature and informational texts put side by side for easier planning. More than a dozen teaching ideas for each standard. Recommendations on how to cultivate critical habits of mind. A glossary of academic language for each standard. An online bank of graphic organizers, reproducible charts, and more. The CCSS in English Language Arts/ELA articulate rigorous grade-level expectations focused on higher-order thinking processes in the areas of speaking, listening, reading, and writing to prepare all students to be college and career ready. To this end, this reference guide is designed to increase educators' ability to make teaching and learning decisions based on research-based best practices for the academic and language achievement of English language learners (ELLs). It can also serve to initiate professional learning conversations and guide educators to resources that accelerate and improve the teaching and learning of ELL students. **A Leader's Guide to Science Curriculum Topic Study** Susan Mundry, Page Keeley, Carolyn Landel, 2009-11-24 The Curriculum Topic Study (CTS) process, funded by the US National Science Foundation, helps teachers improve their practice by linking standards and research to content, curriculum, instruction, and assessment. Key to the core book, Science Curriculum Topic Study, this resource helps science professional development leaders and teacher educators understand the CTS approach and how to design, lead, and apply CTS in a variety of settings that support teachers as learners. The authors provide everything needed to facilitate the CTS process, including a solid foundation in the CTS framework, multiple designs for half-day and full-day workshops, professional learning communities, and one-on-one instructional coaching, facilitation, group processing, and materials management strategies, and a CD-ROM with handouts, PowerPoint slides, and templates. By bringing CTS into schools and other professional development settings, science leaders can enhance their teachers' knowledge of content, improve teaching practices, and have a positive impact on student learning.
