Know Your Chances Understanding Health Statistics:

Know Your Chances Steven Woloshin, Lisa M. Schwartz, H. Gilbert Welch, 2008-11-30 Understanding risk Putting risk in perspective Risk charts a way to get perspective Judging the benefit of a health intervention Not all benefits are equal understand the outcome Consider the downsides Do the benefits outweigh the downsides Beware of exaggerated importance Beware of exaggerated certainty Who's behind the numbers *Journal of the National Cancer Institute*, 2009-07

Reduce Your Cancer Risk Barbara Boughton, Michael Stefanek, 2010-03-01 Develop your anticancer strategy Knowledge is power Knowing your cancer risk is your best weapon against cancer Co published with the American Cancer Society Reduce Your Cancer Risk Twelve Steps to a Healthier Life will help you assess your risk based on your family history genetics and environment and help you make a comprehensive action plan to lower your chances of getting cancer With an anticancer strategy in place you'll help to protect yourself against cancer and live a healthier happier life Reduce Your Cancer Risk includes the most up to date information on Personal risk assessment Lifestyle changes Preventive health strategies Genetic counseling Preventive anti cancer medications *The Slippery Slope of Healthcare* Steven Z. Kussin, 2020-03-24 Dr Steven Kussin physician and a pioneer in the Shared Decision movement takes readers through the steps of how to avoid the many pitfalls of unnecessary and sometimes even dangerous medical care The American healthcare system is subsidized by its services to healthy people The goal as it is for any business is to encourage people to become consumers by creating an emotionally fueled demand for things that are suddenly and urgently needed It's hard to make healthy people well it's easy to make them sick Under the goal to make you even healthier the medical industry identifies and encourages investigations and preventive technologies for problems unlikely to occur unlikely to harm unlikely to benefit from testing and once diagnosed unlikely to benefit from treatment Profitable services go on indefinitely for those who are young and well For the health care industry being in good health is not just the best way to live good health is also the slowest way to die Many people find themselves on what the author calls the Slippery Slope experiencing a cascade of escalating misfortunes produced by more tests with incrementally greater risk expense and fewer benefits Many people who in the attempt to improve what is already just fine unquestioningly pay an immediate and visible price for what are distant invisible and uncertain benefits The central starting point for initiating a Slippery Slope adventure can be the first blood test the first screening test the first x ray the first pill or the first diagnosis that's accepted by unwitting and trusting consumers The bottom of the Slippery Slope is occupied by those previously well but who now are damaged and by others who suffered needless unscheduled deaths America's famed consumer skepticism when judging retail products is curiously and dangerously absent in their interactions within the healthcare system Here Steven Kussin offers strategies that give readers knowledge and power by offering unique perspectives information and resources He confronts the mighty forces arrayed against health care consumers and helps readers learn to identify them themselves The power of money the authority of

science the stature of physicians the lure of elective health improvements the promise of technology and the pitch perfect perfect pitches of televised ads all conspire to push people in directions that are often at odds with their stated priorities and interests This book is dedicated to one lesson The view from atop the Slope before making a health care decision is better than the view from the bottom after having made a bad one For more information visit <https://theslipperyslopebook.com>

Evidence-Based Practice Across the Health Professions Tammy Hoffmann, Sally Bennett, Christopher Del Mar, 2023-09-27 Making decisions informed by evidence means that healthcare can be provided responsibly collaboratively effectively and sustainably Evidence Based Practice Across the Health Professions is designed to guide and support students and clinicians to learn how to make evidence informed decisions This book will help you learn how to decide what clinical questions to ask search for research evidence to answer them and analyse the evidence to decide if the results are believable important and applicable You will learn how to talk with patients about evidence and make collaborative decisions and how to approach evidence implementation at an individual and organisational level Written by international and discipline leaders in evidence based practice across a range of health professions the fourth edition has been fully updated in line with the latest developments in this field from around the world Updated clinical scenarios woven through the chapters to bring theory to life Suitable for evidence based practice teaching in a wide range of undergraduate and postgraduate professional courses including nursing midwifery physiotherapy occupational therapy speech pathology exercise science nutrition and dietetics paramedicine medicine optometry pharmacy medical imaging and radiation therapy psychology podiatry and complementary and alternative medicine Instructor resources on Evolve Image collection PowerPoint slides Short answer and tutorial questions Clinical scenarios Test bank Student and Instructor resources on Evolve Interactive Quiz Worksheets **Seeking Sick** Alan Cassels, 2012-04-30 Alan Cassels strips layers of expectation hype jargon false starts and conflicts of interest off the medical screening mantra Norton M Hadler author of *Worried Sick* Why wouldn't you want to be screened to see if you're at risk for cancer heart disease or another potentially lethal condition After all better safe than sorry Right Not so fast says Alan Cassels His *Seeking Sick* takes us inside the world of medical screening where well meaning practitioners and a profit motivated industry offer to save our lives by exploiting our fears He writes that promoters of screening overpromise on its benefits and downplay its harms which can range from the merely annoying to the life threatening If you're facing a screening test for breast or prostate cancer high cholesterol or low testosterone someone is about to turn you into a patient You need to ask yourself one simple question Am I ready for all the things that could go wrong With engaging clarity backed by academic rigor Cassels discusses a variety of popular investigational procedures an excellent way to start the important process of self education Quill Quire Smartly written and very readable Brian Goldman MD author of *The Secret Language of Doctors* Cassels tackles this touchy topic looking at it test by test His overarching message is that modern medicine has overpromised with claims that screening will save our lives He contends that with the lack of hard evidence on benefits the

evidence of harm from by such screening as well as the multi billion dollar interests at stake we should approach this kind of screening with great precaution Canadian Women s Health Network

Risk, Chance, and Causation Michael B. Bracken, 2013-06-18 The press and other media constantly report news stories about dangerous chemicals in the environment miracle cures the safety of therapeutic treatments and potential cancer causing agents But what exactly is actually meant by increased risk should we worry if we are told that we are at twice the risk of developing an illness And how do we interpret reduced risk to properly assess the benefits of noisily touted dietary supplements Demonstrating the difficulty of separating the hype from the hypothesis noted epidemiologist Michael Bracken clearly communicates how clinical epidemiology works Using everyday terms Bracken describes how professional scientists approach questions of disease causation and therapeutic efficacy to

provide readers with the tools to help them understand whether warnings of environmental risk are truly warranted or if claims of therapeutic benefit are justified *Damned Lies and Statistics* Joel Best, 2012-07-08 Here by popular demand is the updated edition to Joel Best's classic guide to understanding how numbers can confuse us In his new afterword Best uses examples from recent policy debates to reflect on the challenges to improving statistical literacy Since its publication ten years ago *Damned Lies and Statistics* has emerged as the go to handbook for spotting bad statistics and learning to think critically about these influential numbers *America the Fearful* Benjamin Radford, 2022-04-18 National panics about crime immigrants police and societal degradation have been pervasive in the United States of the 21st century Many of these fears begin as mere phantom fears but are systematically amplified by social media news media bad actors and even well intentioned activists There are numerous challenges facing the U S but Americans must sort through which fears are legitimate threats and which are amplified exaggerations This book examines the role of fear in national panics and addresses why many Americans believe the country is in horrible shape and will continue to deteriorate despite contradictory evidence Political polarization racism sexism economic inequality and other social issues are examined Combining media literacy folklore investigative journalism psychology neuroscience and critical thinking approaches this book reveals the powerful role that fear plays in clouding perceptions about the U S It not only records the repercussions of this toxic phenomenon but also offers evidence based solutions *Risk Savvy* Gerd Gigerenzer, 2015-03-31 A new eye opener on how we can make better decisions by the author of *Gut Feelings* In this age of big data we often trust that expert analysis whether it's about next year's stock market or a person's risk of getting cancer is accurate But as risk expert Gerd Gigerenzer reveals in his latest book *Risk Savvy* most of us including doctors lawyers and financial advisors often misunderstand statistics leaving us misinformed and vulnerable to exploitation Yet there's hope In *Risk Savvy* Gigerenzer gives us an essential guide to the science of good decision making showing how ordinary people can make better decisions for their money their health and their families Here Gigerenzer delivers the surprising conclusion that the best results often come from considering less information and listening to your gut **Plastic Surgery E-Book** James C Grotting, Peter C.
