Conceptions of Knowledge Creation, Knowledge and Knowing Yuh Huann Tan, Seng Chee Tan, 2020-03-11 This book responds to calls for further advancing knowledge creation in schools. It examines sixteen Chinese Language teachers from Singapore since language teachers are primarily responsible for the basic literacy that is the foundation of students' lifelong learning. Positing that people's cultural beliefs and the language they use are inseparable, the book argues that Chinese language teachers possess a unique understanding of the various phenomena that reflect the influences of Chinese culture by virtue of the language they speak and teach. For the purposes of the investigation, it employs phenomenography, a methodology aimed at finding and systematising how people interpret the world around them to determine and describe Chinese language teachers' conceptions of these phenomena. *Knowing How: Essays on Knowledge, Mind, and Action* John Bengson, Marc A. Moffett, 2011-12-09 Knowledge how to do things is a pervasive and central element of everyday life. Yet it raises many difficult questions that must be answered by philosophers and cognitive scientists aspiring to understand human cognition and agency. What is the connection between knowing how and knowing that? Is knowledge how simply a type of ability or disposition to act? Is there an irreducibly practical form of knowledge? What is the role of the intellect in intelligent action? This volume contains fifteen state-of-the-art essays by leading figures in philosophy and linguistics that amplify and sharpen the debate between intellectualists and anti-intellectualists about mind and action, highlighting the conceptual, empirical, and linguistic issues that motivate and sustain the conflict. The essays also explore various ways in which this debate informs central areas of ethics, philosophy of action, epistemology, philosophy of language, and philosophy of mind and cognitive science. *Knowing How* covers a broad range of topics dealing with tacit and procedural knowledge, the psychology of skill, expertise, intelligence, and intelligent action, the nature of ability, the syntax and semantics of embedded questions, the mind-body problem, phenomenal character, epistemic injustice, moral knowledge, the epistemology of logic, linguistic competence, the connection between knowledge and understanding, and the relation between theory and practice. This is the book on knowing how, an invaluable resource for philosophers, linguists, psychologists, and others concerned with knowledge, mind, and action. **Musical Knowledge** Keith Swanwick, 1994 Examines the tension between intuitive and analytical ways of making sense of the world by exploring musical knowledge and experience. **Knowledge and Ignorance of Self in Platonic Philosophy** James M. Murphy, 2008-07-31 Today's managers, business owners and public relations practitioners grapple daily with a fundamental question about contemporary crisis management: to what extent is it possible to control events and stakeholder responses to them in order to contain escalating crises or safeguard an organization's reputation? The authors meet the question head on, departing from other crisis management texts and arguing that a complexity-based approach is superior to the standard simplification model of organizational learning.
