IP and Antitrust: An Analysis of Antitrust Principles Applied to

Intellectual Property Law, 3rd Edition Hovenkamp, Janis, Lemley, Leslie, Carrier, 2016-01-01 *Economics*, 1999 IP and Antitrust Christina Bohannon, 2013 *Producing Prosperity* Randall G. Holcombe, 2013 The substantial prosperity that characterizes market economies at the beginning of the twenty first century is relatively recent in human history Prior to the Industrial Revolution economic progress was so slow that people would not have been able to recognize it in their lifetimes whereas today economic progress is so much a part of people s lives that they take it for granted In this new volume Randall G Holcombe argues that economic analysis as it developed through the twentieth century relies heavily on concepts of economic equilibrium and is not descriptive of the dynamic real world economy that is characterized by economic progress Even in dynamic settings economic models focus on income growth leaving out the entrepreneurial forces that generate economic progress resulting in the introduction of new goods and services and new production processes Economic analysis focuses on the forces that lead to an economic equilibrium not the forces that produce prosperity This characterization of economic analysis describes a substantial component of economics as it has developed over the past century However there are also economists who have analyzed the factors that lead to an entrepreneurial and innovative economy generating progress rather than equilibrium This volume does not question the value of past research but argues that looking ahead economics should build on its past to focus on factors that create an entrepreneurial and innovative economy that is characterized by progress and prosperity This would make economic analysis more consistent with the remarkable progress and prosperity that characterizes the modern economy This volume lays out a framework for economic analysis that consistently incorporates the real world factors that produce prosperity **Telecom Antitrust Handbook**, 2005 Comprehensive review of the application of antitrust law and principles to the communications market and an invaluable resource for both antitrust and telecom practitioners It discusses substantive antitrust law applicable to the communications industries including horizontal mergers vertical mergers joint ventures and restraints of trade *Measuring Business Interruption Losses and Other Commercial Damages* Patrick A. Gaughan, 2009-08-07 An updated explanation of the methodology for how lost profits should be measured Now fully revised and updated focused on commercial litigation and the many common types of cases this is the only book in the field to explain the complicated process of measuring business interruption damages The book features an easy to understand and apply step by step process for how losses should be measured so as to be accurate and reliable and consistent with the relevant laws With a new chapter on the economics of punitive damages the new edition also explains detailed methods for measuring damages in contract litigation intellectual property lawsuits antitrust and securities cases This new Second Edition incorporates the latest developments in the fields of economics and accounting while also integrating the most current changes in case law Here s what you will find Each

chapter includes new materials and updated content Added websites for sources of data Includes a website for updated tables that can be utilized by readers A section of the new cases involving Daubert challenges to economists Includes methods on how to do industry research A new section covering the equity risk premium and the various recent research studies which set forth the debate on what the premium should be Containing exhibits tables and graphs new cases involving Dauber how to do industry research equity risk premium research studies on the marketability discount anti trust punitive damages and more Measuring Business Interruption Losses and Other Commercial Damages Second Edition incorporates the relevant literature and research that has come out in this field over the past four years *Southern Economic Journal* ,1999
