**Jane's All the World's Aircraft** Frederick Thomas Jane, 2005      Approved Flight Manual for the British Aerospace, Jetstream Series 3100, Model 3112 British Aerospace Public Limited Company, 1988      P-40 Warhawk Pilot's Flight Operating Manual Periscope Film Com, 2006-05-18 Flown by the American Volunteer Group in China known as the Flying Tigers the P 40 Warhawk earned a reputation for its toughness in combat Facing odds of 6 to 1 in most combat situations AVG pilots relied on their skill daring and their aircraft's superior diving speed to achieve victory By war's end the Tigers had destroyed more than 1200 Japanese planes with another 700 listed as probables Their own losses came to 573 aircraft Originally printed by the U S Army Air Force for pilots transitioning to the P 40 this flight manual contains detailed information about one of history's great planes Originally classified as restricted the manual was declassified long ago and is here reprinted in book form Some color images appear in black and white and some pages have been slightly reformatted Care has been taken however to preserve the integrity of the text      Northrop X-4 Bantam Pilot's Flight Operating Instructions United States Air Force, 2008-09-01 Designed without horizontal stabilizers the X 4 Bantam had a semi tailless design that bore some resemblance to Germany's Me 163 rocket plane The small twin jet craft relied on combined elevator and aileron surfaces known as elevons for pitch and roll control The role of the X 4 was to explore the transonic speed zone and to determine whether the design would lessen the stability and control problems affiliated with compressibility Although two Bantams were built only one proved mechanically sound The second was flown over eighty times by Northrop Air Force and NACA pilots They learned that the X 4 was sensitive in pitch and showed a tendency to hunt about all three axes as it approached Mach 1.0 Thus the X 4's design proved a failure Originally printed by Northrop NACA and the USAF this handbook provides a fascinating glimpse inside the cockpit of this experimental plane The manual was recently declassified and is here reprinted in book form      **P-47 Thunderbolt Pilot's Flight Operating Manual** Periscope Film Com, 2006-06-12 Known as the Jug because of its fuselage shape the Republic P 47 Thunderbolt flew in every theatre of WWII except Alaska Nearly 13 000 were built by war's end The large aircraft carrier eight Browning machine guns and up to 2 000 lbs of bombs or rockets and proved an effective fighter and bomber The radial Pratt and Whitney powerplant put out over 2500 h p and propelled the P 47 at a maximum speed of 426 mph at 30 000 feet Originally published by the U S Army Air Force this handbook taught pilots everything they needed to know before entering the cockpit This affordable facsimile of a real WWII manual has been reformatted Care has been taken to preserve the integrity of the text      T-38 Talon Pilot's Flight Operating Instructions United States Air Force, 2009-02-01 Northrop's T 38 Talon was the world's first supersonic trainer aircraft and remains in service today in air forces worldwide It entered service in 1961 and quickly set climb records earning it the nickname white rocket Nearly 1200 Talons were produced before the last one rolled off the assembly line in 1972 Capable of a speed of Mach 1.3 and a climb rate approaching 34 000 feet per minute the T 38's performance was sufficient to

warrant service as the USAF Thunderbirds aircraft in the mid 1970s Its primary role however was as a dedicated training and proficiency platform More than 50 000 USAF NASA and NATO pilots have flown the Talon a record that may never be matched Originally printed by the U S Air Force and Northrop this handbook for the T 38 provides a fascinating glimpse inside the cockpit of this famous aircraft Originally classified restricted the manual was recently declassified and is here reprinted in book form      *The B-29 Airplane Commander Training Manual for the Superfortress.* by U.S. Army Air Force,2017-01-12 The Boeing B 29 was one of the most sophisticated aircraft of WWII It featured many innovations including guns that could be fired by remote control and pressurized crew compartments It was also the heaviest production plane of the war with terrific range and bomb carrying capabilities Carrying a crew of ten the Superfortress devastated Japan in a series of raids in 1944 45 Finally in August of 1945 the B 29s Enola Gay and Bock s Car dropped the atomic bombs and forced Japan to surrender Originally printed by the U S Army Air Force this B 29 Airplane Commander Pilot s Training Manual taught pilots everything they needed to know about the Superfortress Classified Restricted the text was declassified long ago and is here reprinted in book form THIS MANUAL is the text for your training as a B 29 pilot and air plane commander The Air Forces most experienced training and supervisory personnel have collaborated to make it a complete exposition of what your pilot duties are how each duty will be performed and why it must be performed in the manner prescribed The techniques and procedures described in this book are standard and mandatory In this respect the manual serves the dual purpose of a training checklist and a working handbook Use it to make sure that you learn everything described herein Use it to study and review the essential facts concerning everything taught Such additional self study and review will not only advance your training but will alleviate the burden of your already overburdened instructors This training manual does not replace the Technical Orders for the airplane which will always be your primary source of information concerning the B 29 so long as you fly it This is essentially the textbook of the B 29 Used properly it will enable you to utilize the pertinent Technical Orders to even greater advantage      **Douglas Skystreak and Skyrocket Flight Operating Manual** United States Air Force,2008-09 The D 558 aircraft were part of a transonic research program originated by NACA and the U S Navy The D 558 1 Skystreak turbojet was designed in 1945 and first flew in 1947 at Muroc It quickly set a new world speed record of over 650 miles per hour Although it approached Mach 1 0 in level flight the Skystreak could only break the speed of sound in a dive The successor aircraft the D 558 2 Skyrocket was equipped with a turbojet and the same rocket system as Bell s X 1 The jet was used for takeoff and landing and the rockets allowed the aircraft to travel into the transonic zone The Skyrocket test program began in 1948 In 1953 Scott Cross field bested that mark and flew into aviation history when he became the first person to reach Mach 2 0 in the plane Originally printed by the U S Navy NACA and Douglas this book contains manuals for both of these amazing aircraft Originally classified Restricted they have been declassified and are here reprinted in book form      **Airplane Flight Manual for Grumman Gulfstream**
