Jinlun Manual:

Newport Manual on Arctic Security Walter Berbrick, Gaele Piche, Michael Zimmerman, 2022-11-15 The Arctic's growing strategic importance in world affairs and the increasing attention it receives from states inside and outside the region warrants greater cooperation and understanding of practical measures for maintaining regional security and stability. Approaches that seek to systematically isolate one of the Arctic states, particularly Russia, will only contribute to mistrust and impede prospects for regional stability. The product of a three-year project by twenty Arctic scholars and practitioners, The Newport Manual on Arctic Security sets out thirty international principles of security applicable to this maritime region. It addresses topics related to awareness, confidence building, measures and capabilities. An extensive commentary accompanies each principle, which sets forth its basis during peacetime, explains practical barriers and solutions to implementation, and outlines critical disagreements within the group. Transparency, cooperation, and communication provide the basis for the principles and commentary. This book is policy and politics neutral and does not represent the official position, plans, or policies of any state or international organization, including the U.S. Naval War College. The project's leadership was committed to objectivity and has included the views of all participants to reach consensus on future prospects for cooperation and agreement.

Esoteric Buddhism and Texts Jinhua Chen, 2024-02-08 This book explores trans-cultural and cross-border transformation of Esoteric Buddhism in East Asia, focusing on the significance of Esoteric Buddhism in relation to some forms of material culture, including rituals, arts, and the construction of sacred space and narratives. In East Asia, Esoteric Buddhism's influences can be seen across all levels of society, not only in that it achieved a recognizable sectarian identity but also because elements of esoteric teachings were absorbed by other religious schools, influencing their philosophical tenets and everyday practices. The influence was not confined to the religious sphere; scholars have been paying more and more attention to the significance of Tang Esoteric Buddhism in relation to material culture and the dissemination of Esoteric Buddhist technologies in South Central and East Asia. No matter how one looks at a mala, an integral feature of esoteric practice, or the uncannily expressive statues of Buddhas, Bodhisattvas, or Yidams that come in all shapes and sizes, or the murals that depict the variegated, mysterious themes of the esoteric tradition, one can always recognize the profound connection between art and Esoteric Buddhism. Esoteric influences also abound in East Asian literature across different genres, displaying its unique characters both in poetry and prose. Likewise, in architecture, one can readily make out the enigmatic, colorful, and distinctive elements characteristic of the esoteric tradition. Monks initiated into the esoteric lineages not only brought Buddhist classics and practices to China but also advanced knowledge in astronomy, calendrical calculations, and mathematical theories. The chapters in this volume investigate the profound and far-reaching impacts wrought by Esoteric Buddhism on rituals, arts, and the construction of sacred space and narratives in East Asia. This book will be beneficial to advanced students and researchers interested in Religious Studies, History, and Buddhist studies. It was originally
