Souvernität fokussiert auf die EU und schlägt eine Definition des Begriffs vor. Ein wichtiger Bestandteil ist ein komparativer Index für digitale Souveränität, der auf sekundären Daten basiert und mittels quantitativer Methoden verifiziert und validiert wird. Die Ergebnisse des Indexes zeigen, dass EU-Staaten in Sachen digitaler Souveränität Entwicklungspotenziale haben. Aus der Analyse werden handlungsleitende Maßnahmen abgeleitet, wie etwa höhere Investitionen in Start-ups, Förderung des Exports von IKT-Dienstleistungen und Verringerung von Handelsbarrieren im digitalen Bereich. Die Dissertation betont, dass die konsequente Umsetzung dieser Maßnahmen zur Stärkung der digitalen Souveränität der EU-Staaten beitragen kann.

Empirical Research and Writing Leanne C. Powner, 2014-11-04. Students can easily misstep when they first begin to do research. Leanne C. Powner's new title *Empirical Research and Writing: A Student's Practical Guide* provides valuable advice and guidance on conducting and writing about empirical research. Chapter by chapter, students are guided through the key steps in the research process. Written in a lively and engaging manner and with a dose of humor, this practical text shows students exactly how to choose a research topic, conduct a literature review, make research design decisions, collect and analyze data, and then write up and present the results. The book's approachable style and just-in-time information delivery make it a text students will want to read, and its wide-ranging and surprisingly sophisticated coverage will make it an important resource for their later coursework.

Econometrics in Theory and Practice Panchanan Das, 2019-09-05. This book introduces econometric analysis of cross-section, time-series, and panel data with the application of statistical software. It serves as a basic text for those who wish to learn and apply econometric analysis in empirical research. The level of presentation is as simple as possible to make it useful for undergraduates as well as graduate students. It contains several examples with real data and Stata programmes and interpretation of the results. While discussing the statistical tools needed to understand empirical economic research, the book attempts to provide a balance between theory and applied research. Various concepts and techniques of econometric analysis are supported by carefully developed examples with the use of statistical software package Stata 15.1 and assumes that the reader is somewhat familiar with the Stata software. The topics covered in this book are divided into four parts. Part I discusses introductory econometric methods for data analysis that economists and other social scientists use to estimate the economic and social relationships and to test hypotheses about them using real-world data. There are five chapters in this part covering the data management issues, details of linear regression models, the related problems due to violation of the classical assumptions. Part II discusses some advanced topics used frequently in empirical research with cross-section data. In its three chapters, this part includes some specific problems of regression analysis. Part III deals with time-series econometric analysis. It covers intensively both the univariate and multivariate time-series econometric models and their applications with software programming in six chapters. Part IV takes care of panel data analysis in four chapters. Different aspects of fixed effects and random effects are discussed here. Panel data analysis has been extended by taking dynamic panel data models, which are most suitable for macroeconomic research.

The book is invaluable for students and researchers of social sciences business management operations research engineering and applied mathematics *Time Series Analysis for the Social Sciences* Janet M. Box-Steffensmeier, John R.

Freeman, Matthew P. Hitt, Jon C. W. Pevehouse, 2014-12-22 Time series or longitudinal data are ubiquitous in the social sciences Unfortunately analysts often treat the time series properties of their data as a nuisance rather than a substantively meaningful dynamic process to be modeled and interpreted Time Series Analysis for the Social Sciences provides accessible up to date instruction and examples of the core methods in time series econometrics Janet M Box Steffensmeier John R Freeman Jon C Pevehouse and Matthew P Hitt cover a wide range of topics including ARIMA models time series regression unit root diagnosis vector autoregressive models error correction models intervention models fractional integration ARCH models structural breaks and forecasting This book is aimed at researchers and graduate students who have taken at least one course in multivariate regression Examples are drawn from several areas of social science including political behavior elections international conflict criminology and comparative political economy [The Assumptions Economists Make](#)

Jonathan Schlefer, 2012-03-20 Economists make confident assertions in op ed columns and on cable news so why are their explanations at odds with equally confident assertions from other economists And why are all economic predictions so rarely borne out Harnessing his frustration with this contradiction Schlefer set out to investigate how economists arrive at their opinions *Knowledge and Networks* Johannes Glückler, Emmanuel Lazega, Ingmar Hammer, 2017-01-05 This book discusses a core question in many fields of the social sciences namely how to create share and adopt new knowledge It creates an original space for conversation between two lines of research that have developed largely in parallel for a long time social network theory and the geography of knowledge This book considers that relational thinking has become increasingly important for scholars to capture societal outcomes by studying social relations and networks whereas the role of place space and spatial scales has been somewhat neglected outside an emergent geography of knowledge The individual contributions help integrate network arguments of connectivity geographical arguments of contiguity and contextuality into a more comprehensive understanding of the ways in which people and organizations are constrained by and make use of space and networks for learning and innovation Experts in the fields of geography sociology economics political science psychology management and organizational studies develop conceptual models and propose empirical research that illustrates the ways in which networks and geography play together in processes of innovation learning leadership and power This book is open access under a CC BY 4.0 license [Overcoming Data Sparsity: A Machine Learning Approach to Track the Real-Time](#)

[Impact of COVID-19 in Sub-Saharan Africa](#) Karim Barhoumi, Seung Mo Choi, Tara Iyer, Jiakun Li, Franck Ouattara, Andrew Tiffin, Mr. Andrew J Tiffin, Jiaxiong Yao, 2022-05-06 The COVID 19 crisis has had a tremendous economic impact for all countries Yet assessing the full impact of the crisis has been frequently hampered by the delayed publication of official GDP statistics in several emerging market and developing economies This paper outlines a machine learning framework that helps

track economic activity in real time for these economies As illustrative examples the framework is applied to selected sub-Saharan African economies The framework is able to provide timely information on economic activity more swiftly than official statistics
