The Routledge Handbook on Cities of the Global South

Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Geographic

Interpretations of the Internet Aharon Kellerman, 2016-04-26 This book introduces the Internet through a systematic geographical interpretation thus shedding light on the Internet as a spatial entity The book s approach is to extend basic concepts developed for terrestrial geography to cyberspace most notably those relating to space structure place distance mobility and presence It further considers the Internet by its constitution of information space communications space and

screen space By using well known concepts from traditional human geography this book proposes a combination of terrestrial and virtual geographies which may in turn help in coping with Internet structures and contents The book appeals to human and economic geographers especially those interested in information and Internet geographies It may also be of special interest and importance to sociologists and media scholars and students dealing with communication technology and the Internet

Religious Education 7-11 Terence Copley, 2002-01-04 The place of religious education in the elementary curriculum is an ambiguous one for many teachers Using a mixture of theory and practical ideas this book will help all elementary teachers whether specialists or not to deliver effective religious education Terence Copley clarifies the legal framework discusses problem areas like the withdrawal of children from the subject and examines key principles and concepts involved in teaching the main areas of religious education He also looks at practical issues of classroom organization and at how religious education can be integrated into topic work but should also remain a subject in its own right

Alternative Food Networks David Goodman, E. Melanie DuPuis, Michael K. Goodman, 2012-02-20 This timely book provides a critical review of the growth of alternative food networks and their struggle to defend their ethical and aesthetic values against the standardising pressures of the corporate mainstream with their placeless and nameless global supply networks It explores how these alternative movements are making a difference and their possible role as fears of global climate change and food insecurity continue to intensify

The Mobilities Paradigm Marcel Endres, Katharina Manderscheid, Christophe Mincke, 2016-05-12 Over the last two decades the conceptualisation and empirical analysis of mobilities of people objects and symbols has become an important strand of social science Yet the increasing importance of mobilities in all parts of the social does not only happen as observable practices in the material world but also takes place against the background of changing discourses scientific theories and conceptualisations and knowledge Within the formation of these mobilities discourses the social sciences constitute a relevant actor Focussing on mobility as an object of knowledge from a Foucauldian perspective rather than a given entity within the historical contingency of movement this book asks How do discourses and ideologies structure the

normative substance social meanings and the lived reality of mobilities What are the real world effects of on the will and the ability to be mobile And how do these lived realities in turn invigorate or interfere with certain discourses and ideologies of mobility **Compromise Planning : A Theoretical Approach from a Distant Corner of Europe** Louis C.

Wassenhoven,2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful modus vivendi but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional involvement **The Routledge Handbook of**

Planning Research Methods Elisabete A. Silva,Patsy Healey,Neil Harris,Pieter Van den Broeck,2014-08-21 The Routledge Handbook of Planning Research Methods is an expansive look at the traditions methods and challenges of research design and research projects in contemporary urban planning Through case studies an international group of researchers planning practitioners and planning academics and educators all recognized authorities in the field provide accounts of designing and implementing research projects from different approaches and venues This book shows how to apply quantitative and
