Keys To Unlocking The Universe:

Keys to Unlocking the Universe Clemons Leon Kunkel, 2015-12-09 Deep Space is where we want to go but we are limited by our knowledge and understanding of the universe. If we knew more about why the universe looks the way it does could we not go further? Over the last hundred years through technological advances humanity has been able to reach out and observe the great cosmic mysteries. Penetrating over 15 000 000 000 light years into the past only to find more and more enigmas compounding upon our original fantastical and yet unresolved discoveries. Imagine if our understanding of the foundations of astrophysics were intact. Where would we be able to go? In this book Keys to Unlocking the Universe Clemons Kunkel presents his ground breaking theories on all great scientific discoveries such as Black Holes, Dark Matter and the Dark Energy that were previously disjointed, now brought together in one cohesive theory. Through four years of presentations and research into the theories he has discovered over thirty seven empirical evidences providing substantial undeniable validation beyond coincidence. A cornerstone of this theory includes the events CMB, Great Attractor, Great Wall, Great Void, viewed previously as isolated unknown phenomena, can now be understood as integral. New theories on explaining why the universe looks the way it does because it has to. This is not Super String Theory or M theory or Super Gravity Theory, it is a totally new mind blowing theory. How is space squeezed and pushed on by the other dimensions? Is it possible to travel faster than the speed of light? Do you know how fast you are traveling in space right now? If you take just one of the speeds like the Milky Way galaxy it is moving toward a region of space called the GREAT ATTRACTOR at a breakneck speed of 14 000 000 14 Million miles an hour. What if we were to use the speeds that we already have to help us reach that unbelievable speed of light 186 282 miles per second and not break the known laws of science, what would that be worth in space travel? Just think about living on an exoplanet, planets around other suns, would you even want to go? Mars One has a fantastic idea of putting people on Mars. More than 2000 brave and adventurous people sign up to live on Mars, did you sign up? Clemons Kunkel did because he thinks we must get used to traveling to another planet close to us before we can try deep space exploration. This will take some time getting everything put together to live off earth but time is something that we may not have that much of. Why? There have been 5 mass extinctions here on earth and we should not be here for the sixth catastrophe event. Space is where we must go to survive. We are also destroying earth resources, there are just too many of us but there is an easy solution. Move into space where there is plenty of room for us to live, we just need a better way of getting around the cosmos. The new theory in this book maybe what we need to make that possible. So come on in and read these unbelievable theories of why our universe looks the way it does.

The Network of Consciousness Austin Tolman, Dedication To those who seek connection in an ever expanding universe and to the boundless potential of human empathy and understanding. Overview In The Network of Consciousness Austin Tolman blends science, philosophy and spirituality to explore the interwoven relationships between our inner worlds and the cosmos. Through seven chapters he guides readers on a journey from the microcosmic dance of cells to

the macrocosmic pull of galaxies touching on themes of consciousness empathy and the evolution of humanity This book invites readers to reflect on their own place within the universal network offering insights that challenge conventional thinking and spark deeper understanding Perfect for those curious about the complexities of life the mysteries of the universe and the future of human consciousness The Network of Consciousness offers a fresh perspective on how everything from cells to stars is connected

Forged in War R. David Lankes, 2021-05-15 I deal for readers seeking a more comprehensive look at information dissemination technology its context and its impact on the way in which we now live Library Journal Starred Review Many of what we think of as Information Age tools and media computers cell phones the internet encryption and more evolved directly out of modern warfare These tools started with World War I which began not with arms but with England cutting off underwater cables to Germany and isolating it accelerated through World War II and the Cold War and now play a center role in both declared and non declared conflicts like election interference and cyberbattles We buy phones and smart speakers because they are new and unlock great potential Voice assistants like Siri and Alexa help us do our work and answer that one piece of trivia that bugs us Yet these devices are data gatherers They collect repackage and monetize our questions purchases photographs web surfing to form a data industry now larger than the oil industry Well over 100 years ago the data industry put in place a business model that trades our attention for news and entertainment That model has evolved into a complex art and science of message targeting and content ownership that has splintered communities while simultaneously concentrating media ownership to a few massive corporations Forged in War takes a critical look at the systems we use and how we ended up in a society that values data over personal liberty and commerce over the public good It tells a compelling and previously untold story of how our ideas of information and knowledge reflect the century of war that has militarized our worldview Author David Lankes's work has been funded by organizations such as The MacArthur Foundation The Institute for Library and Museum Services NASA The U S Department of Education The U S Department of Defense The National Science Foundation and The U S State Department This his latest book will help all of us learn how war has shaped our world and how to begin to create an agenda to stand down weaponized data and a media that seeks to own our personal even intimate data like one owns a gold mine

Chemistry DeMYSTiFieD, Second Edition Linda D. Williams, 2011-05-13 A PROVEN formula for mastering CHEMISTRY Trying to understand chemistry but feel like the information's just not bonding with your brain Here's your solution Chemistry Demystified Second Edition helps you grasp both fundamental and complex concepts with ease Written in a step by step format this practical guide first covers atomic theory elements symbols and the Periodic Table of the Elements The book then delves into solids liquids gases solutions orbitals chemical bonds acids and bases Electrochemistry thermodynamics biochemistry and organic environmental and nuclear chemistry are discussed In depth examples detailed illustrations and worked out problems make it easy to understand the material and end of chapter quizzes and a final exam help reinforce learning It's a no brainer You'll learn

about Molecular and structural formulas Metallurgy Gas laws Molar mass Molecular orbital theory Covalent and ionic bonds Oxidation reduction The laws of thermodynamics Organic reactions Biological and environmental markers Simple enough for a beginner but challenging enough for an advanced student Chemistry Demystified Second Edition helps you master this fascinating subject **Keys: Unlocking the Universe** Steve Boudreault, Carolee Eubanks, Leila McNamara, Sally Jean Genter, Chris Whigham, Christopher Valin, Eugene Ramos, Susan Eager, Sheri McMurray, D.
