errors this is what practitioners do Nonetheless there is an increasing interest in the use of formal methods in software testing It is expected that formal approaches are about to make a major impact on emerging testing technologies and practices Testing proves to be a good starting point for introducing formal methods in the software development process This volume contains the papers presented at the 3rd Workshop on Formal Approaches to Testing of Software FATES 2003 that was in a liaison with the IEEE ACM Conference on Automated Software Engineering ASE 2003 This year FATES received 43 submissions Each submission was reviewed by at least three independent reviewers from the program committee with the help of additional reviewers Based on their evaluations 18 papers submitted by authors from 13 different countries were selected for presentation at the workshop

ECOOP '99 - Object-Oriented Programming Rachid Guerraoui, 1999-06-02 My tailor is Object Oriented Most software systems that have been built recently are claimed to be Object Oriented Even older software systems that are still in commercial use have been upgraded with some OO flavors The range of areas where OO can be viewed as a must have feature seems to be as large as the number of fields in computer science If we stick to one of the original views of OO that is to create cost effective software solutions through modeling physical abstractions the application of OO to any field of computer science does indeed make sense There are OO programming languages OO operating systems OO databases OO specifications OO methodologies etc So what does a conference on Object Oriented Programming really mean I honestly don't know What I do know is that since its creation in 1987 ECOOP has been attracting a large number of contributions and ECOOP conferences have ended up with high quality technical programs featuring interesting mixtures of theory and practice Among the 183 initial submissions to ECOOP 99 20 papers were selected for inclusion in the technical program of the conference Every paper was reviewed by three to five referees The selection of papers was carried out during a t day program committee meeting at the Swiss Federal Institute of Technology in Lausanne Papers were judged according to their originality presentation quality and relevance to the conference topics
