Professor Hannah Sevan, University of Massachusetts Boston. **Professional Development of Chemistry Teachers** Rachel Mamlok-Naaman, Ingo Eilks, George Bodner, Avi Hofstein, 2022-06-29. Continuous professional development of chemistry teachers is essential for any effective chemistry teaching due to the evolving nature of the subject matter and its instructional techniques. Professional development aims to keep chemistry teaching up to date and to make it more meaningful, more educationally effective, and better aligned to current requirements. Presenting models and examples of professional development for chemistry teachers from pre-service preparation through to continuous professional development, the authors walk the reader through theory and practice. The authors discuss factors which affect successful professional development such as workload, availability, and time constraints, and consider how we maintain the life-long learning of chemistry teachers. With a solid grounding in the literature and drawing on many examples from the authors' rich experiences, this book enables researchers and educators to better understand teachers' roles in effective chemistry education and the importance of their professional development. **Course Success in the Undergraduate General Chemistry Lab**

Thomas Elert, 2019-11-15. Stetig hohe Studienabbruchquoten in den MINT-Fächern an deutschen Hochschulen, welche auch aus geringem Kurserfolg in einführenden Laborpraktika resultieren könnten, und die wachsende Kritik an der Qualität und Wirksamkeit ebendieser, machen eine eingehende Betrachtung von Laborpraktika notwendig. Diese Studie untersuchte die Lernziele des Laborpraktikums Allgemeine Chemie für Lehramtsstudierende im ersten Semester sowie Faktoren für den Kurserfolg, um daraus Aussagen über den Stellenwert von Laborpraktika in der universitären Bildung, insbesondere für

langfristigen Studienerfolg abzuleiten Dazu wurde ein theoretisches Modell zu Grunde gelegt welches das Vorwissen der Studierenden und die Lernzielpassung zwischen Studierenden und Lehrenden als zwei entscheidende Faktoren für Kurserfolg berücksichtigt Constantly high student dropout rates in STEM subjects at German universities which could be the result of low course success in introductory laboratory courses among other things and increasing criticism about their quality and effectiveness necessitate these laboratory courses to be examined thoroughly This study investigated the learning goals of the General Chemistry laboratory course for first year students in teacher training and factors for course success in order to make statements about the significance of laboratory courses for university education particularly for long term study success For this purpose a theoretical model that assumes the students prior knowledge and learning goal alignment between students and their lab instructors to be two defining factors for lab course success was used as a framework

**More Teacher Friendly Chemistry Labs and Activities** Deanna York,2010-09 Do you want to do more labs and activities but have little time and resources Are you frustrated with traditional labs that are difficult for the average student to understand time consuming to grade and stressful to complete in fifty minutes or less Teacher Friendly Minimal safety concerns Minutes in preparation time Ready to use lab sheets Quick to copy Easy to grade Less lecture and more student interaction Make up lab sheets for absent students Low cost chemicals and materials Low chemical waste Teacher notes for before during and after the lab Teacher follow up ideas Step by step lab set up notes Easily created as a kit and stored for years to come Student Friendly Easy to read and understand Background serves as lecture notes Directly related to class work Appearance promotes interest and confidence General Format Student lab sheet Student lab sheet with answers in italics Student lab quiz Student lab make up sheet The Benefits Increases student engagement Creates a hand on learning environment Allows teacher to build stronger student relationships during the lab Replaces a lecture with a lab Provides foundation for follow up inquiry and problem based labs Teacher Friendly Chemistry allows the busy chemistry teacher with a small school budget the ability to provide many hands on experiences in the classroom without sacrificing valuable personal time
