Laboratory Life The Construction Of Scientific Facts 2nd Edition:

Laboratory Life Bruno Latour, Steve Woolgar, 1986-09-21 The pioneering laboratory study in the sociology of scientific knowledge The first and deservedly the most influential book length account of day to day work in a single laboratory setting
ISIS Science, Technology, and Society Sal P. Restivo, 2005 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture Science Technology and Society B contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index *Writing Like An Engineer* Dorothy A. Winsor, 2013-11-05 Comprised of a study spanning over five years this text looks at four engineering co op students as they write at work Since the contributors have a foot in both worlds work and school the book should appeal to people who are interested in how students learn to write as well as people who are interested in what writing at work is like Primarily concerned with whether engineers see their writing as rhetorical or persuasive the study attempts to describe the students changing understanding of what it is they do when they write Two features of engineering practice that have particular impact on the extent to which engineers recognize persuasion are identified a reverence for data and the hierarchical structure of the organizations in which engineering is most commonly done Both of these features discourage an open recognition of persuasion Finally the study shows that the four co op students learned most of what they knew about writing at work by engaging in situated practice in the workplace rather than by attending formal classes The Social and Interactional Dimensions of Human-Computer Interfaces Peter J. Thomas, 1995-05-26 This volume analyzes the social implications of computer interfaces *Representation in Scientific Practice Revisited* Catelijne Coopmans, Janet Vertesi, Michael E. Lynch, Steve Woolgar, 2014-01-03 A fresh approach to visualization practices in the sciences that considers novel forms of imaging technology and draws on recent theoretical perspectives on representation Representation in Scientific Practice published by the MIT Press in 1990 helped coalesce a long standing interest in scientific visualization among historians philosophers and sociologists of science and remains a touchstone for current investigations in science and technology studies This volume revisits the topic taking into account both the changing conceptual landscape of STS and the emergence of new imaging technologies in scientific practice It offers cutting edge research on a broad array of fields that study information as well as short reflections on the evolution of the field by leading scholars including some of the contributors to the 1990 volume The essays consider the ways in which viewing experiences are crafted in the digital era the embodied nature of work with digital technologies the constitutive role of materials and technologies from chalkboards to brain scans in the production of new scientific knowledge the metaphors and images mobilized by communities of practice and the status and significance of scientific imagery in professional and popular culture Contributors Morana Ala Michael

Perspectives on Conceptual Change Barbara J. Guzzetti, Cynthia R. Hynd, 2013-12-16 Perspectives on Conceptual Change presents case study excerpts illustrating the influence on and processes of students conceptual change and analyses of these cases from multiple theoretical frameworks Researchers in reading education have been investigating conceptual change and the effects of students prior knowledge on their learning for more than a decade During this time this research had been changing from the general and cognitive average effects of interventions on groups of students to the specific and personal individuals reactions to and conceptual change with text structures Studies in this area have begun to focus on the social contextual and affective influences on conceptual change These studies have potential to be informed by other discourses Hence this book shows the results of sharing data in the form of case study excerpts with researchers representing varying perspectives of analyses Instances of learning are examined from cross disciplinary views Case study authors in turn respond to the case analyses The result is a text that provides multiple insights into understanding the learning process and the conditions that impact learning

The ^ASecond Age of Computer Science Subrata Dasgupta, 2018-05-01 Between the genesis of computer science in the 1960s and the advent of the World Wide Web around 1990 computer science evolved in significant ways The author has termed this period the second age of computer science This book describes its evolution in the form of several interconnected parallel histories

Beyond the Science Wars Ullica Christina Olofsdotter Segerstrale, Ullica Segerstrale, Ullica Christina Olofsdotter Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives

Visualization in the Age of Computerization Annamaria Carusi, Aud Sissel Hoel, Timothy Webmoor, Steve Woolgar, 2014-08-21 Digitalization and computerization are now pervasive in science This has deep consequences for our understanding of scientific knowledge and of the scientific process and challenges longstanding assumptions and traditional frameworks of thinking of scientific knowledge Digital media and computational processes challenge our conception of the way in which perception and cognition work in science of the objectivity of science and the nature of scientific objects They bring about new relationships between science art and other visual media and new ways of practicing science and organizing scientific work especially as new visual media are being adopted by science studies scholars in their own practice This volume reflects on how scientists use images in the computerization age and how digital technologies are affecting the study of science

Handbook of Constructionist Research James A. Holstein, Jaber F. Gubrium, 2013-10-21 Constructionism has become one of the most popular research approaches in the social sciences But until now little attention has been given to the conceptual and methodological underpinnings of the constructionist stance

and the remarkable diversity within the field This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research how it is put into practice in multiple disciplines and where it may be headed in the future The volume critically examines the analytic frameworks strategies of inquiry and methodological choices that together form the mosaic of contemporary constructionism making it an authoritative reference for anyone interested in conducting research in a constructionist vein

The Idea of Authorship in Copyright Lior Zemer,2017-03-02 As information flows become increasingly ubiquitous in our post digital environment the challenges to traditional concepts of intellectual property and the practices deriving from them are immense The romantic understanding of the lone author as an endless source of new creations has to face these challenges In order to do so this work presents a collectivist model of intellectual property rights The core argument is that since copyright works enjoy profit from significant public contribution they should not be privately owned but considered to be a joint enterprise made real by both the public and author It is argued that every copyright work depends on and is reflective of the author s exposure to externalities such as language culture and the various social events and processes that occur in the public domain therefore copyright works should not be regarded as exclusive private property The study takes its organizing principle from John Locke defining and proving the fatal flaw inherent in debates on copyright on the one hand the copyright community is eager to arm authors with a robust property right over their creation while on the other this community totally ignores the fact that the exposure of the individual to externalities is what makes him or her capable of creating material that is copyrightable Just as Locke was against the absolute authority of kings the expressed view of the study is against the exclusive right an author can claim

Schools and Styles of Anthropological Theory Matei Candea,2018-01-23 This book presents an overview of important currents of thought in social and cultural anthropology from the 19th century to the present It introduces readers to the origins context and continuing relevance of a fascinating and exciting kaleidoscope of ideas that have transformed the humanities and social sciences and the way we understand ourselves and the societies we live in today Each chapter provides a thorough yet engaging introduction to a particular theoretical school style or conceptual issue Together they build up to a detailed and comprehensive critical introduction to the most salient areas of the field The introduction reflects on the substantive themes which tie the chapters together and on what the very notions of theory and theoretical school bring to our understanding of anthropology as a discipline The book tracks a core lecture series given at Cambridge University and is essential reading for all undergraduate students undertaking a course on anthropological theory or the history of anthropological thought It will also be useful more broadly for students of social and cultural anthropology sociology human geography and cognate disciplines in the social sciences and humanities

Bruno Latour in Pieces Henning Schmidgen, 2014-10-15 Bruno Latour stirs things up Latour began as a lover of science and technology co founder of actor network theory and philosopher of a modernity that had never been modern In the meantime he is regarded not just as one of the most intelligent and also popular exponents of science studies but also as a major innovator of the social sciences an exemplary wanderer who walks the line between the sciences and the humanities This book provides the first comprehensive overview of the Latourian oeuvre from his early anthropological studies in Abidjan Ivory Coast to influential books like *Laboratory Life* and *Science in Action* and his most recent reflections on an empirical metaphysics of modes of existence In the course of this enquiry it becomes clear that the basic problem to which Latour's work responds is that of social tradition the transmission of experience and knowledge What this empirical philosopher constantly grapples with is the complex relationship of knowledge time and culture *How Scientific*

Instruments Speak Bas de Boer, 2021-01-14 Science is highly dependent on technologies to observe scientific objects For example astronomers need telescopes to observe planetary movements and cognitive neuroscience depends on brain imaging technologies to investigate human cognition But how do such technologies shape scientific practice and how do new scientific objects come into being when new technologies are used in science In *How Scientific Instruments Speak* Bas de Boer develops a philosophical account of how technologies shape the reality that scientists study arguing that we should understand scientific instruments as mediating technologies Rather than mute tools serving pre existing human goals scientific instruments play an active role in shaping scientific work De Boer uses this account to discuss how brain imaging and stimulation technologies mediate the way in which cognitive neuroscientists investigate human cognitive functions The development of cognitive neuroscience runs parallel with the development of advanced brain imaging technologies drawing a lot of public attention sometimes called neurohype because of its alleged capacity to demystify the human mind By analyzing how the objects that cognitive neuroscientists study are mediated by brain imaging technologies de Boer explicates the processes by which human cognition is investigated Encyclopedia of Literature and Science Pamela Gossin, 2002-08-30

Science and literature have always been strange bedfellows Like puzzle pieces they fit because they re different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading

Adolescent Psychiatry, V. 26 Lois T. Flaherty, 2013-06-17 Volume 26 of The Annals begins with essays that address the challenge of maintaining human connections in a biological century Philip Katz focuses on the human encounter between therapist and patient whereas Vivian Rakoff emphasizes the continuing identity of the healer throughout history Papers on adolescent development which challenge readers to look beyond preconceived ideas include Robert Galatzer Levy s examination of adolescence as a social construction expressed in contradictory cultural narratives and Jack Drescher s exploration of the developmental narratives of gay men in order to illuminate the seeming invisibility of gay adolescents A section dedicated to Trauma Violence and Suicide explores interventions with special groups of high risk adolescents including violent offenders suicide attempters and adolescent refugees A special section on attention deficit hyperactivity disorder and conduct disorders includes a debate on whether or not conduct disorder is actually a valid diagnosis The final section of Volume 26 addresses social issues of continuing relevance to adolescent psychiatry the juvenile death penalty and gays in the military Reprinted here are the ASAP s position statements on these two issues along with its amici curiae brief in support of the petitioner in the landmark Supreme Court case of Thompson v Oklahoma Volume 26 of The Annals tracks the continuing evolution of adolescent psychiatry as it strives to keep pace with therapeutic and social responsibilities which in the 21st century have become increasingly intertwined We have here a typically thoughtful compendium that in drawing attention to the pressing issues before those who work with adolescents highlights both the field s achievements to date and the work that lies before it
