Non-biomedical Perspectives on Pain and its Prevention and Management Mark I. Johnson, James Woodall, Emmanouil Georgiadis, Antonio Bonacaro, Isobel Jacob, 2024-06-06. Overreliance on the biomedical paradigm has contributed in part to illogical use of surgery and long term opioid medication with harmful physical, psychological, social and economic consequences. Pain literature is dominated by biomedical research at the expense of a holistic understanding of the lived experience of pain. Pain practice seems overly consumed with the burden of pain at an individual level, patient centred pain management and has neglected exploration of societal level, community centred or environmental level, ecologically centred solutions.

Les techniques chirurgicales classiques et mini-invasives adaptées à la réparation rapide sont développées. Les indications de libération d'arthrodèse voire de prothèse discale sont discutées. Enfin l'impact socioprofessionnel est abordé ainsi que des prises en charge plus originales comme l'ostéopathie.
