Islam, Secularism, and Liberal Democracy Nader Hashemi, 2009-04-02 Islam s

relationship to liberal democratic politics has emerged as one of the most pressing and contentious issues in international affairs Nader Hashemi challenges the widely held belief among social scientists that religious politics and liberal democratic development are structurally incompatible While there are certainly tensions between religion and democracy the two are not irreconcilable Liberal democracy requires a form of secularism to sustain itself yet the main political cultural and intellectual resources that Muslim democrats can draw upon are religious How can this paradox be reconciled Hashemi makes three principal arguments First in societies where religion is a key marker of identity the road to liberal democracy must pass through the gates of religious politics The process of democratization therefore cannot be artificially de linked from debates about the normative role of religion in government Secondly while liberal democracy requires secularism religious traditions are not born with an inherent secular and democratic conception of politics These ideas must be developed and in an emerging democracy how they are developed is critical Finally Hashemi argues that there is an intimate relationship between religious reformation and political development While the first often precedes the second these processes are deeply interlinked Democratization does not require a privatization of religion but it does require a reinterpretation of religious ideas that are conducive to liberal democracy By engaging in this reinterpretation religious groups can play a central role in the development and consolidation of democracy Islam Secularism and Liberal Democracy argues for a rethinking of democratic theory so that it incorporates the variable of religion in the development of liberal democracy In the process it proves that an indigenous theory of Muslim secularism is not only possible but is a necessary requirement for the advancement of liberal democracy in Muslim societies

Beneath the Crust of Culture Howard F. Stein, 2004-01-01 In this book the author presents a pioneering interpretation of culture as constituting a dynamic relationship between the visible crust and the elusive core of social life He meticulously maps the role of the unconscious in shaping much of American life in the late 20th and early 21st centuries He crosses and transcends disciplinary boundaries in studies of September 11 2001 the 1999 Columbine High School massacre the execution of Timothy McVeigh the 1995 Oklahoma City bombing the 1999 Worcester Massachusetts fire and the eruption of hypernationalism and xenophobia in nations and workplaces all as cultural phenomena with a psychodynamic core He shows how the experience of loss in the face of massive social change often leads to equally massive defence against the experience of mourning Beneath the Crust of Culture will be of interest not only for behavioural and social science professionals but also for a lay public interested in understandings of culture deeper than the surface of the news and of official pronouncements

The Fullness of Time in a Flat World Scott Waalkes, 2010-01-01 Best selling author Thomas Friedman says that globalization has made the world flat and that we cannot stop the process But while it is right to say that globalization tends to flatten our world it is wrong to say that there are no alternatives to current patterns of economic ecological political and cultural integration This book argues that the Christian liturgical calendar provides a constructive alternative to the globalization of economics ecologies politics and cultures It does so by incorporating the church into the fullness of time in the gospel narrative thereby helping us escape from the dead end of Friedman s flat world so that we can improvise healthier ways of being globally integrated
