Tania Bazzani, 2018-01-08 *Handbook of Research on Aestheticization of Violence, Horror, and Power* Erdem, M. Nur, Kocabay-Sener, Nihal, Demir, Tuğba, 2020-10-02 Individuals seek ways to repress the sense of violence within themselves and often resort to medial channels The hunger of the individual for violence is a trigger for the generation of violent content by media owners of political power owners of religious power etc However this content is produced considering the individual s sensitivities Thus violence is aestheticized Aesthetics of violence appear in different fields and in different forms In order to analyze it an interdisciplinary perspective is required The Handbook of Research on Aestheticization of Violence Horror and Power brings together two different concepts that seem incompatible aesthetics and violence and focuses on the basic motives of aestheticizing and presenting violence in different fields and genres as well as the role of audience reception Seeking to reveal this togetherness with different methods research analyses and findings in different fields that include media urban design art and mythology the book covers the aestheticization of fear power and violence in such mediums as public relations digital games and performance art This comprehensive reference is an ideal source for researchers academicians and students working in the fields of media culture art politics architecture aesthetics history cultural anthropology and more Re-Imagining Community and Civil Society in Latin America and the Caribbean Roberta Rice, Gordana Yovanovich, 2016-07-15 Latin American and Caribbean communities and civil societies are undergoing a rapid process of transformation Instead of pervasive social atomization political apathy and hollowed out democracies which have become the norm in some parts of the world this region is witnessing an emerging collaboration between community civil society and government that is revitalizing democracy This book argues that a key explanation lies in the powerful and positive relationship between community and civil society that exists in the region The ideas of community and civil society tend to be studied separately as analytically distinct concepts however this volume seeks to explore their potential to work together A unique contribution of the work is the space for dialogue it creates between the social sciences and the humanities Many of the studies included in the volume are based on primary fieldwork and place based case studies Others relate literature music and film to important theoretical works providing a new direction in interdisciplinary studies and highlighting the role that the arts play in community revival and broader processes of social change A truly multi disciplinary book bridging established notions of civil society and community through an authentically interdisciplinary approach to the topic **Mission Strategy in the City** Enoch Jinsik Kim, 2017-11-07 This book was written to suggest an appropriate mission strategy by identifying key issues that impact urban ethnicities through an urban socioanthropological lens This book is based on the author s sixteen years of living in China where he conducted missionary work in urban areas The book discusses the author s interactions with enclaves of ethnic minorities who had recently arrived in the city after migrating from rural areas The minorities struggles to balance cultural assimilation and tradition preservation are highlighted throughout The book explains that similar phenomena occur within Korean American communities in Los Angeles as well

Based on these observations the author states that immigrants in many cities face similar social issues and find similar resolutions to them Though there are many negative aspects to urban areas readers will see some positive features of cities that can contribute to effective evangelism The book highlights three main points 1 Ethnic urban dwellers evolve into many more diverse ways than commonly thought 2 Ethnic groups are actively choosing the future of their community types 3 Modern cities create many new communication channels interethnically and also across social strata within ethnicities

Brexit, President Trump, and the Changing Geopolitics of Eastern Europe Theodor Tudoroiu, 2018-04-05 This book analyzes the combined consequences of Brexit and of the new US foreign policy under President Trump on the geopolitical situation of Eastern Europe It perceives the evolution of the East European regional security complex as a struggle between the European Union's Kantian win-win geopolitical vision and Russia's neoclassical geopolitics also promoted by President Trump In the most probable scenario the latter approach will have the upper hand The EU's post-Brexit control by the Franco-German axis will likely be followed by the geopolitical irrelevance of the EU due to the renationalization of member states foreign policy with Germany becoming the main West European actor Consequently Eastern Europe will be turned into the arena of a mainly three-cornered neoclassical geopolitics rivalry opposing Russia the Franco-German axis and then Germany and the US in alliance with the post-Brexit UK and certain East European states The book will appeal to scholars across the fields of International Relations Geopolitics European Studies and Area Studies
