Overviews and fundamentals Case studies and applications Advances in modeling mapping and coupling Wetland Soils Michael J. Vepraskas, Christopher B. Craft, 2016-04-21

Boundaries of a wetland must be identified and located in the field by examining three parameters wetland plants wetland hydrology and hydric soils This book explains how wetland soils are formed described and can be identified in the field The new edition is a major revision of the 2000 book Written by scientists with extensive field and academic experience it contains 11 new chapters updates throughout and augments the previous material on wetland functions and restorations while maintaining the field oriented focus of the first book **Developments in Soil Classification, Land Use Planning and Policy Implications** Shabbir A. Shahid, Faisal K. Taha, Mahmoud A. Abdelfattah, 2013-02-15

As the world's population continues to expand maintaining and indeed increasing agricultural productivity is more important than ever though it is also more difficult than ever in the face of changing weather patterns that in some cases are leading to aridity and desertification The absence of scientific soil inventories especially in arid areas leads to mistaken decisions about soil use that in the end reduce a region's capacity to feed its population or to guarantee a clean water supply Greater efficiency in soil use is possible when these resources are properly classified using international standards Focusing on arid regions this volume details soil classification from many countries It is only once this information is properly assimilated by policymakers it becomes a foundation for informed decisions in land use planning for rational and sustainable uses Soil Erosion Issues in Agriculture Danilo Godone, Silvia Stanchi, 2011-10-21

The book deals with several aspects of soil erosion focusing on its connection with the agricultural world Chapters topics are various ranging from irrigation practices to soil nutrient land use changes or tillage methodologies The book is subdivided into fourteen chapters sorted in four sections grouping different facets of the topic introductive case studies erosion management in vineyards soil erosion issue in dry environments and erosion control practices Certainly due to the extent of the subject the book is not a comprehensive collection of soil erosion studies but it aims to supply a sound set of scientific works concerning the topic It analyzes different facets of the issue with various methodologies and offers a wide series of

case studies solutions practices or suggestions to properly face soil erosion and moreover may provide new ideas and starting points for future researches

Soil Magnetism Neli Jordanova, 2016-11-10. Soil Magnetism Applications in Pedology. Environmental Science and Agriculture provides a systematic comparative and detailed overview of the magnetic characterization of the major soil units and the observed general relationships, possibilities and perspectives in application of rock magnetic methods in soil science, agriculture and beyond. Part I covers detailed magnetic and geochemical characterization of major soil types according to the FAO classification system, with Part II covering the mapping of topsoil magnetic signatures on the basis of soil magnetic characteristics. The book concludes with practical examples on the application of magnetic methods in environmental science, agriculture, soil pollution and paleoclimate. Provides an overview of the major findings of uncontaminated soil profiles and proposes a system of magnetic characteristics. Elucidates the relationship between geochemical and magnetic characteristics of different soil types, providing a basis for wider recognition and application of soil magnetism in classical pedagogical characterization of soils. Covers the peculiarities of the main taxonomic soil groups in terms of magnetic mineralogy and depth variations in concentration, grain size and phase composition of iron oxides.
