## The Vietnam War, 1954–1975

### Lesson 2 Vietnam Divides the Nation

#### Review Questions: Outlining

**DIRECTIONS:** Read the lesson and complete the outline below. Refer to your textbook to fill in the blanks.

#### I. The Antiwar Movement Emerges

- A. As the Vietnam War dragged on, support waned because many believed that the Johnson administration was not telling the truth about the war.
- B. Many Americans believed a credibility gap existed because of inconsistencies between what was shown by media and what the administration said about the war.
- C. Students and teachers at universities held teach-ins to explain why they opposed the war, while many protesters focused on what they thought was an unfair draft system. Most of the soldiers were working-class and minority youths.
- D. As the war went on, many young men burned their draft cards while an estimated 500,000 refused to go.

Many soldiers argued that if they were old enough to fight, they were old enough to

vote. The 26th amendment gave 18-year-olds the

- a. right to vote in federal and state elections, supported the war and those who opposed the war.

#### B. 1968: The Peace Year

- A. Senator Eugene McCarthy opposed the war and South Vietnamese troops. This attack, called the Tet Offensive, was reported. Americans, however, were alarmed that an enemy nearly defeated could launch such a large-scale attack.

On March 25, 1968, Johnson declared the nation with the announcement that

he would not seek reelection.

His announcement marked the nation turning away from the war.

- B. Barry Kennedy was appointed to be in the lead for the Democratic Party nomination for president.

- C. In the presidential election of 1968, Republican candidate Richard Nixon won because he promised to bring peace and restore law and order to the country.

**Price, Profit and Production** Louis August Rufener,1927      *Macroeconomics, fifth edition* Robert J. Barro,1997-10-20  
Robert Barro's *Macroeconomics* has become the classic textbook presentation of the equilibrium approach to macroeconomics. In its first four editions this book has shown undergraduates how market clearing models with strong microeconomic foundations can be used to understand real world phenomena and to evaluate alternative macroeconomic policies. Moreover, a single unified framework works as well for short term business fluctuation as for long term economic growth. This latest edition includes the most recent theoretical and empirical developments in economic growth, recent evidence on the macroeconomics of labor markets and public finance, and up to date results on the interplay between nominal and real variables.

**Essentials of Economics Study Guide** Rosemary Cunningham,2007-01-03 For each chapter the Study Guide provides an introduction, fill in the blank, chapter review, learning tips with graphical analysis, 4-5 comprehensive problems and exercises, 20 multiple choice questions. Also included are solutions to all fill in the blank problems, exercises, and quizzes in the Guide.

**Federal Register** ,1986-06-05      *Biennial Report of the Attorney-General* Nevada. Office of the Attorney General,1925      **Biennial Report** Nevada. Office of Labor Commissioner,1917      Wage and Hour Manual ,1947

**Applied Intermediate Macroeconomics** Kevin D. Hoover,2012 A complete course in applied macroeconomics at the intermediate level that emphasizes the application of economic theory to real world data and policy.

*Lumber Manufacturer and Dealer* ,1914      **Reconstructing Macroeconomics** Lance TAYLOR,Lance Taylor,2009-06-30  
*Macroeconomics* is in disarray. No one approach is dominant and an increasing divide between theory and empirics is evident. This book presents both a critique of mainstream macroeconomics from a structuralist perspective and an exposition of modern structuralist approaches. The fundamental assumption of structuralism is that it is impossible to understand a macroeconomy without understanding its major institutions and distributive relationships across productive sectors and social groups. Lance Taylor focuses his critique on mainstream monetarist, new classical, new Keynesian, and growth models. He examines them from a historical perspective, tracing monetarism from its eighteenth century roots and comparing current monetarist and new classical models with those of the post-Wicksellian, pre-Keynesian generation of macroeconomists. He contrasts the new Keynesian vision with Keynes's General Theory and analyzes contemporary growth theories against long traditions of thought about economic development and structural change.
