Procreative Ethics Fritz Oehlschlaeger, 2010-01-01 Procreative Ethics addresses questions at the beginning of life from a point of view that is alternatively philosophical and christian The author seeks to defend philosophically some positions taken partly on Christian grounds while also trying to make the implications of Christian convictions intelligible to those who do not necessarily share

those convictions The author positions himself neither as a moral friend nor moral stranger preferring instead the role of moral acquaintance to his audience From that position the goal is to find areas of fruitful agreement while clarifying differences that may lead to truer reconciliations further on in the conversation The book opens with an attempted natural law defense of artificial contraception devotes four chapters to criticism of current defenses of abortion and then takes up in six remaining chapters such matters as genetic enhancement of children the justice or injustice of genetic revision the harm conundrum or non identity problem designing for disability and reproductive cloning Fritz Oehlschlaeger has written a remarkable book that needs to be read by everyone with a stake in moral questions at life s beginning Displaying theological and philosophical sophistication as well as a profound wisdom these arguments must be taken seriously by those who agree with Oeschlaeger as well as those who do not Joel James Shuman King s College Writing with a modesty that betrays the depth of argument that characterizes Procreative Ethics Fritz Oehlschlaeger has written the most important book in bioethics in recent memory Bioethics has long suffered from a stale imagination Oehlschlaeger an acknowledged outsider to the field brings to his work a fresh imagination shaped by literary texts and a profound humanity Hopefully many will want to emulate his work in other areas of bioethics Stanley Hauerwas Duke University In this new book Fritz Oehlschlaeger has made masterful and persuasive arguments about the moral challenges looming at the beginning of human life And he does this as a highly informed non specialist an English professor no less Robert Benne Roanoke College *Renewing the Stuff of Life* Cynthia B. issues related to stem cells and it should be of great interest to bioethicists researchers clinicians philosophers theologians lawyers policy makers and general readers
