In contrast, many managers feel ill equipped to promote a culture of creative endeavour for this type of work environment and lack the know-how to put it into practice. This book covers theory, practice and impact metrics of both convergent and divergent thinking tools and provides managers with the ideas, tools and guidance to develop a corporate culture conducive to intrapreneurial thinking, idea creation and testing and moving inventions from ideas to viable business concepts, products and profitable innovations. This book includes numerous step-by-step tutorials to help the reader to learn concepts quickly.

KAIZEN HANDBK - EVERYTHING YNT Larry Travis, 2016-11-20 Asked to explain why a few people truly excel, most people offer one of two answers. The first is hard work. Yet we all know plenty of hard workers who have been doing the same job for years or decades without becoming great. The other possibility is that the elite possess an innate talent for excelling in their field. We assume that Einstein was born with an astounding gift for maths and Bill Gates carries a gene for brilliant investing. The trouble is scientific evidence doesn't support the notion that specific natural talents make great performers. Both the hard work and natural talent camps are wrong. What really makes the difference is a highly specific kind of effort.
