Handbook Of Motivation And Cognition Across Cultures:

Handbook of Motivation and Cognition Across Cultures Richard Sorrentino, Susumu Yamaguchi, 2011-04-28 In recent years there has been a wealth of new research in cognition particularly in relation to supporting theoretical constructs about how cognitions are formed processed reinforced and how they then affect behavior Many of these theories have arisen and been tested in geographic isolation It remains to be seen whether theories that purport to describe cognition in one culture will equally prove true in other cultures The Handbook of Motivation and Cognition Across Cultures is the first book to look at these theories specifically with culture in mind The book investigates universal truths about motivation and cognition across culture relative to theories and findings indicating cultural differences Coverage includes the most widely cited researchers in cognition and their theories as seen through the looking glass of culture The chapters include self regulation by Tory Higgins unconscious thought by John Bargh attribution theory by Bernie Weiner and self verification by Bill Swann among others The book additionally includes some of the best new researchers in cross cultural psychology with contributors from Germany New Zealand Japan Hong Kong and Australia In the future culture may be the litmus test of a theory before it is accepted and this book brings this question to the forefront of cognition research Includes contributions from researchers from Germany New Zealand Japan Hong Kong and Australia for a cross cultural panel Provides a unique perspective on the effect of culture on scientific theories and data

Suicide Across Cultures Meryam Schouler-Ocak, Murad Moosa Khan, 2024-09-04 Over 700 000 people globally take their own lives every year which equates to one death by suicide every 40 seconds Among teenagers and young adults suicide is the second most common cause of death after road traffic accidents Overall almost three times as many men than women die by suicide There are however significant variations in the patterns of suicide across cultures gender age geographic locations and personal history due to the complex relationship of how these factors converge One thing that remains consistent is that every death is a tragedy for family friends and all colleagues Traditions of suicidal behaviour are deeply rooted in any given culture and so examining the cultural influences can be of paramount importance in the understanding and assessment of a suicidal crisis *Suicide Across Cultures* offers the opportunity to expand knowledge beyond majority groups and to look further than the dominant paradigm in suicide research treatment and prevention With the majority of global suicides taking place in non Western societies minority groups are an essential area in suicide research Written by experts from around the world this fascinating textbook includes topics and regions that are not usually covered in texts on suicide and self harm It provides a unique and important insight for academics and students in psychiatry as well as anyone from the wider public with an interest in the psychiatry of suicide across cultures

Embodied Idolatry Kyle Edward Haden, 2020-01-31 *Embodied Idolatry A Critique of Christian Nationalism* is an examination of the effect of Christian nationalism on Christian practice in the United States Kyle Edward Haden focuses on the mechanisms by which such beliefs become sedimented into the emotional embodied structures of the

church and the individual Using a variety of disciplines Haden thus identifies and highlights how such beliefs and practices are in fact idolatrous and inhabit an anti Christian theological and ethical space This book describes the formative process and mechanisms by which social and cultural values are acquired through imitation by the individual and within ecclesial communities As a constructive countermeasure it investigates Jesus s practice in his own social cultural political religious and economic context and argues that Christian nationalism is a betrayal of Jesus s teachings in light of his own practice of hospitality and table fellowship This book thus calls Christians to conversion putting loyalty to the kingdom of God over that of the nation

Towards a Four-Tiered Model of Mediation Hugo Luz dos Santos, 2023-02-13 Underpinned by a hybrid methodology ranging from social sciences to human sciences this book parses mediation in four perspectives which stands as an

unparalleled methodological approach so far Mediation has long been tethered to piecemeal and haphazard approaches which have flatly failed to capture the gist of the uniqueness of this often poorly latched on and poorly understood dispute resolution mechanism This book argues that in order to fully grasp the richness of such dispute resolution mechanism mediation must be parsed in four tiers The first tier is the social dynamics of mediation The second tier is the cultural dynamics of mediation The third tier is the legal dynamics of mediation The fourth tier is the cross border and cross cultural dynamics of mediation Taken together the four tiers that premise the four tiered model of mediation seek to unlock the finding in view of which law and social reality are tightly interlocked In this vein it is the underlying social reality of a given jurisdiction that should dictate the design of a pre suit court connected mandatory mediation with an easy opt out a central claim of both social dynamics of mediation the first tier of the four tiered model of mediation and legal dynamics of mediation the third tier of the four tiered model of mediation Multidisciplinary Dynamics of Mediation Hugo Luz dos Santos,2025-09-15

This book casts an analytical eye on the legal dynamics of mediation premised on a multidisciplinary approach This is the very first book to meld mediation and applied psychology with a view to portray the myriad of cognitive biases with which the great bulk of legal actors grapple tussle with in mediation settings The overriding goal of this book is to provide a multidisciplinary comprehensive and full fledged framework to legal dynamics of mediation while emphasizing the paramount importance of incorporative mediation to protect the fundamental rights of the weakest disputant in the room something that has not been done yet This book is the very first one to provide a framework frame of reference to the usage of artificial intelligence in the remit of both mediation settings and Restorative Relationship Session RRS *Computational Social Psychology* Robin R. Vallacher, Stephen J. Read, Andrzej Nowak, 2017-05-25 Computational Social Psychology showcases a new approach to social psychology that enables theorists and researchers to specify social psychological processes in terms of formal rules that can be implemented and tested using the power of high speed computing technology and sophisticated software This approach allows for previously infeasible investigations of the multi dimensional nature of human experience as it unfolds in accordance with different temporal patterns on different timescales In effect the computational approach represents a rediscovery of the themes and ambitions that launched the field over a century ago The book brings together social psychologists with varying topical interests who are taking the lead in this redirection of the field Many present formal models that are implemented in computer simulations to test basic assumptions and investigate the emergence of higher order properties others develop models to fit the real time evolution of people s inner states overt behavior and social interactions Collectively the contributions illustrate how the methods and tools of the computational approach can investigate and transform the diverse landscape of social psychology *Persistently Postwar* Blai Guarné, Artur Lozano-Méndez, Dolores P. Martinez, 2019-03-27 From melodramas to experimental documentaries to anime mass media in Japan constitute a key site in which the nation s social memory is articulated disseminated and contested

Through a series of stimulating case studies this volume examines the political and cultural representations of Japan's past showing how they have reinforced personal and collective narratives while also formulating new cultural meanings both on a local scale and in the context of transnational media production and consumption Drawing upon diverse disciplinary insights and methodologies these studies collectively offer a nuanced account in which mass media function as much more than a simple ideological tool

The Evolution of Religion and Morality Martin Lang, Benjamin Grant Purzycki, Joseph Henrich, Ara Norenzayan, 2023-12-04 This volume draws on a unique dataset to answer pressing questions about human religiosity Building upon the first volume in this series it presents results from the second phase of the Evolution of Religion and Morality ERM project The second volume investigates key questions in the evolutionary and cognitive sciences of religion and highlights cultural variability and context specificity of diverse religious systems Chapters draw on a dataset comprising 2 228 participants from 15 ethnographically diverse societies that stretch from Africa and India through Oceania to South America and include hunter gatherers pastoralists horticulturalists subsistence farmers and wage laborers Four chapters using the full dataset answer the following questions What are the general predictors of commitment to supernatural agents Is there a gender gap in religiosity Does belief in punitive gods facilitates cooperation Are supernatural agents implicitly associated with moral concerns Chapters from individual field sites further explore the distinction between moralizing and local gods the potentially disruptive role of belief in local gods on cooperation with anonymous co religionists and the relationship between belief in moralizing gods cooperation and differential access to material resources Above these empirical studies the book also includes an informed discussion with specialists on the challenges of running such a large cross cultural project and gives concrete recommendations for future projects The Evolution of Religion and Morality Volume II will be a key resource for scholars and researchers of religious studies human evolutionary biology psychology anthropology the cultural evolution of religion and the sociology of religion This book was originally published as a special issue of Religion Brain Behavior

Trends and Developments for the Future of Language Education in Higher Education Xiang, Catherine Hua, 2021-06-25 Language education tends to require more face to face interaction and longer hours of both teaching and learning The challenges of ensuring the future and development of the discipline especially after a time of crisis is equally unprecedented A comprehensive overview of the global picture of best practices as well as research in recent times are needed in the field of language education particularly in higher education settings The changing nature of language education in terms of its policy curriculum design methodology and innovation is an essential discussion to advance the field It is critical to explore how a more collaborative global and interdisciplinary mindset as well as technologically driven approaches have emerged through recent years and how it will continue to shape the future development in the field Trends and Developments for the Future of Language Education in Higher Education captures the current trends and ongoing development within language education through a global picture of the best practices as well as the latest research on

language education in higher education settings The chapters cover changes in policy curriculum design methodology and innovation in the modern language education landscape While focusing on the current situation of language education and the changes that it has been undergoing this book also provides information on future development and the overall outlook of language education This book is ideal for teachers instructional designers curricula developers inservice and preservice teachers administrators teacher educators practitioners researchers academicians and students looking for an overview of the current position of language education in higher education Atlas of Moral Psychology Kurt Gray,Jesse Graham,2018-01-23 This comprehensive and cutting edge volume maps out the terrain of moral psychology a dynamic and evolving area of research In 57 concise chapters leading authorities and up and coming scholars explore fundamental issues and current controversies The volume systematically reviews the empirical evidence base and presents influential theories of moral judgment and behavior It is organized around the key questions that must be addressed for a complete understanding of the moral mind Faithful Measures Roger Finke,Christopher D. Bader,2017-10-10 A venture into the art and science of measuring religion in everyday life In an era of rapid technological advances the measures and methods used to generate data about religion have undergone remarkably little change Faithful Measures pushes the study of religion into the 21st century by evaluating new and existing measures of religion and introducing new methods for tapping into religious behaviors and beliefs This book offers a global and innovative approach with chapters on the intersection of religion and new technology such as smart phone apps Google Ngrams crowdsourcing data and Amazon buying networks It also shows how old methods can be improved by using new technology to create online surveys with experimental designs and by developing new ways of mining data from existing information Chapter contributors thoroughly explain how to employ these new techniques and offer fresh insights into understanding the complex topic of religion in modern life Beyond its quantitative contributions Faithful Measures will be an invaluable resource for inspiring a new wave of creativity and exploration in our connected world The Motivation-Cognition Interface Catalina E. Kopetz,Ayelet Fishbach,2017-09-11 This volume honors the work of Arie W Kruglanski It represents a collection of chapters written by Arie s former students friends and collaborators The chapters are rather diverse and cover a variety of topics from politics including international terrorism to health related issues such as addiction and self control to basic psychological principles such as motivation and self regulation the formation of attitudes social influence and interpersonal relationships What these chapters have in common is that they have all been inspired by Arie s revolutionary work on human motivation and represent the authors attempt to apply the basic principles of motivation to the understanding of diverse phenomena *Belief and Cult* Jacob L. Mackey,2025-01-28 A groundbreaking reinterpretation that draws on cognitive theory to show that belief wasn t absent from but rather was at the heart of Roman religion Belief and Cult argues that belief isn t uniquely Christian but was central to ancient Roman religion Drawing on cognitive theory Jacob Mackey shows that despite having nothing to do with salvation or

faith belief underlay every aspect of Roman religious practices emotions individual and collective cult action ritual norms social reality and social power In doing so he also offers a thorough argument for the importance of belief to other non Christian religions At the individual level the book argues belief played an indispensable role in the genesis of cult action and religious emotion However belief also had a collective dimension The cognitive theory of Shared Intentionality shows how beliefs may be shared among individuals accounting for the existence of written unwritten or even unspoken ritual norms Shared beliefs permitted the choreography of collective cult action and gave cult acts their social meanings The book also elucidates the role of shared belief in creating and maintaining Roman social reality Shared belief allowed the Romans to endow agents actions and artifacts with socio religious status and power In a deep sense no man could count as an augur and no act of animal slaughter as a successful offering to the gods unless Romans collectively shared appropriate beliefs about these things Closely examining augury prayer the religious enculturation of children and the Romans own theories of cognition and cult Belief and Cult promises to revolutionize the understanding of Roman religion by demonstrating that none of its features makes sense without Roman belief
