A Practitioner's Guide to Prescribing Antiepileptics and Mood Stabilizers for Adults with Intellectual Disabilities Jose de Leon, 2012-03-02 Emotional behavioral and neuropsychiatric conditions are common in individuals with intellectual disabilities IDs most notably epilepsy aggression self injurious behaviors and bipolar and other mood disorders Despite the prevalence of such problems there is a scarcity in the literature of reliable information on medical treatments for those with IDs A Practitioner's Guide to Prescribing Antiepileptics and Mood Stabilizers for Adults with Intellectual Disabilities provides a detailed framework for prescribing for this challenging population Featuring the most up to date information on factors that inform prescribing the Guide addresses basic issues and controversies e g the rift between evidence based and personalized medicine in treating adults with cognitive deficits Clients specific needs are emphasized in developing appropriate and effective pharmacological intervention for improved outcomes and quality of life Drugs discussed in the Guide include carbamazepine clonazepam

diazepam ethosuximide felbamate gabapentin lacosamide lamotrigine levetiracetam lithium lorazepam oxcarbazepine phenobarbital phenytoin pregabalin primidone rufinamide tiagabine topiramate valproate and zonisamide For each of these compounds the guidelines cover Indications for use relative and absolute contraindications Assessment during treatment therapeutic drug monitoring warning signs and symptoms for caretakers Dosage administration initial and maximum recommended dosage modifications associated with drug drug interactions personal characteristics and where appropriate genetic variations Adverse drug reactions common relatively uncommon and potentially lethal plus risk of metabolic syndrome Guidelines for discontinuation References tables and drug utilization reviews A Practitioner s Guide to Prescribing Antiepileptics and Mood Stabilizers for Adults with Intellectual Disabilities is an indispensable decision making reference for psychiatrists neuropsychologists psychopharmacologists neurologists internists and clinical psychologists *Pediatric Mental Health for Primary Care Providers* Sarah Y. Vinson, Ebony S. Vinson, 2018-09-12 The purpose of this book is to provide a children s mental health resource tailored to the needs of physicians working with children There are currently no such texts despite the fact that there are patient care healthcare systems and workforce factors that indicate a strong need for such a resource Approximately 1 in 5 children are diagnosed with a mental illness by the age of 18 Additionally mental health conditions including Attention Deficit Hyperactivity Disorder are consistently among the most common chronic conditions in pediatric clinical populations Delays in both diagnosis and treatment increase the morbidity associated with these conditions These delays expose the child to negative ramifications of his/her illness and can impact rates of poor academic performance substance use disorders and criminal justice system involvement potentially impacting long term life trajectories Early identification of mental illness and appropriate intervention is critical to the healthy development of youth though physicians in primary care and pediatrics are seldom trained to detect and treat such illnesses The importance of recognizing mental illness is reflected in practice guidelines for pediatric primary care providers as well as in how service delivery is being structured but this does not offer in depth clinical guidelines Additionally integrated care and medical home models include mental health as key components though yet again physicians are often not trained to work with these models While clearly indicated clinically these requirements do not come with significant increases in reimbursement and are added to an already demanding schedule Increasingly providers are also expected to use evidence based screening instruments without exposure to this body of literature Some guidance on using those instruments in context will help them to use those tools more effectively Finally primary care providers and even some adult psychiatrists and psychologists are operating in a healthcare system with a severe nationwide shortage of child and adolescent psychiatrists and mental healthcare providers While a text certainly cannot single handedly compensate for such a workforce shortage it could potentially help to mitigate the negative impact on patients by facilitating early identification and treatment in the primary care setting Additionally with more effective treatment in pediatric settings less complex cases may be addressed before specialty care is needed and the

expertise of child and adolescent psychiatrists can be more effectively used for more complex cases Pediatric Psychiatry in Primary Care is the ultimate resource for clinicians working with children including pediatricians family physicians general psychiatrists psychologists early career child psychiatrists social workers nurses school counselors and all clinical professionals who may encounter children struggling with psychiatric disorders **Psycho-Oncology** Jimmie C.

Holland,William S. Breitbart,Paul B. Jacobsen,Matthew J. Loscalzo,Ruth McCorkle,Phyllis N. Butow,2015-04-02 Originally published by Oxford in 1998 Psycho Oncology was the first comprehensive text in the field and remains the gold standard today Edited by a team of leading experts in psycho oncology spearheaded by Dr Jimmie C Holland the founder of the field the text reflects the interdisciplinary nature and global reach of this growing field Thoroughly updated and developed in collaboration with the American Psychosocial Society and the International Psycho oncology Society the third edition is a current comprehensive reference for psychiatrists psychologists oncologists hospice workers and social workers seeking to understand and manage the psychological issues involved in the care of persons with cancer and the psychological social and behavioral factors that contribute to cancer risk and survival New to this edition are chapters on gender based and geriatric issues and expanded coverage of underserved populations community based programs and caregiver training and education
