Mitchell Polinsky, Steven Shavell, 2007-11-07 Law can be viewed as a body of rules and legal sanctions that channel behavior in socially desirable directions for example by encouraging individuals to take proper precautions to prevent accidents or by discouraging competitors from colluding to raise prices The incentives created by the legal system are thus a natural subject of study by economists Moreover given the importance of law to the welfare of societies the economic analysis of law merits prominent treatment as a subdiscipline of economics Our hope is that this two volume Handbook will foster the study of the legal system by economists The two

volumes form a comprehensive and accessible survey of the current state of the field Chapters prepared by leading specialists of the area Summarizes received results as well as new developments Handbook of Public Sector Economics Donijo Robbins,2017-09-25 The Handbook of Public Sector Economics builds an understanding of the role of public economics in public administration public policy and decision making The handbook introduces a wide variety of current issues related to the public provision and production of goods and services The volume documents the history of economics and fiscal doctrine explores the theory of public goods and the structures from which resources are collected and expanded and analyzes heavily debated issues of economics that are important to current and future practitioners of public policy and administration It focuses on the effects of fiscal policy on savings and investment consumer behavior labor supply wealth property and trade Written in a simple and straightforward style the initial chapters establish the foundation of public economics with the subsequent chapters addressing the collection and distribution of government resources and market reactions to fiscal policies **Classics and Moderns in Economics Volume I** Peter Groenewegen,2002-11-14 Peter Groenewegen s reputation as a chronicler of the history of economics is unparalleled Building on his respected collection on eighteenth century economics this new book focuses on the nineteenth and early twentieth centuries reprinting essays on classical and modern economics Several of the included essays have never been published before *The Theory of Taxation and Public Economics* Louis Kaplow,2011-09-12 The Theory of Taxation and Public Economics presents a unified conceptual framework for analyzing taxation the first to be systematically developed in several decades An original treatment of the subject rather than a textbook synthesis the book contains new analysis that generates novel results including some that overturn long standing conventional wisdom This fresh approach should change thinking research and teaching for decades to come Building on the work of James Mirrlees Anthony Atkinson and Joseph Stiglitz and subsequent researchers and in the spirit of classics by A C Pigou William Vickrey and Richard Musgrave this book steps back from particular lines of inquiry to consider the field as a whole including the relationships among different fiscal instruments Louis Kaplow puts forward a framework that makes it possible to rigorously examine both distributive and distortionary effects of particular policies despite their complex interactions with others To do so various reforms ranging from commodity or estate and gift taxation to regulation and public goods provision are combined with a distributively offsetting adjustment to the income tax The resulting distribution neutral reform package holds much constant while leaving in play the distinctive effects of the policy instrument under consideration By applying this common methodology to disparate subjects The Theory of Taxation and Public Economics produces significant cross fertilization and yields solutions to previously intractable problems **The Handbook of Experimental Economics, Volume 2** John H. #### *Economic Reform*

*Processes in South Asia* Philippa Dee, 2012-07-26 While South Asia s economic reform initiatives of the last two decades were often born in crisis this alone does not account for their occurrence This book looks at the processes and institutional

arrangements behind these reforms and analyses what lessons can be learnt about how South Asia can improve its policy efficiency The book develops ideas about how to overcome the political restraints to reform by drawing on recent theories of political economy and policy learning It tests these ideas against authoritative case studies of actual reform initiatives in South Asia which illustrate processes and institutional arrangements that have helped South Asian governments to sustain reform efforts even in the absence of a strong political base This offers valuable lessons for the global economy as it moves into a phase of rebalancing with the structural adjustments that this will require The book goes on to identify weaknesses that could be addressed by South Asian national governments and regional forums It is an important contribution to studies on South Asian Politics and International Political Economy     Can the Poor Save? Michael Sherraden, 2017-09-08 Many policymakers argue that the best poverty policy not only provides cash to the poor for subsistence but also incentives and structures that encourage long term social and economic improvement As part of this they make the case for Individual Development Accounts IDAs a new policy proposal designed to help the poor save and to build assets This book explores IDAs to determine their effectiveness IDAs are matched savings accounts targeted on low income low wealth individuals Savings in IDAs are used for home ownership post secondary education small business development and other purposes Do IDAs work If they do for whom And does how an IDA is designed determine savings outcomes This volume is the first analysis of matched savings by the poor to use data from monthly bank statements It comes at a critical time as debate rages over the merits of individual social security accounts IDAs also respond to policy that is becoming more asset based and less inclusive of the poor The authors argue for the efficacy of IDAs to counter this tendency They find that while savings outcomes vary among participants no characteristics such as low income or public assistance preclude saving They examine effects of IDA design the match rate savings targets and the use of automatic transfer on savings results and analyze factors that influence varying rates of saving and spending over time They conclude that financial education and other support services though costly improve savings performance To address the issue of cost they suggest a two tier system of IDA design one with broad access and simple services and the other with targeted access and intensive services Can the Poor Save offers a wealth of lessons to those interested in saving and asset accumulation among the poor It not only breaks new ground in the scientific study of savings behavior but also offers concrete evidence based recommendations to improve policies designed to encourage the poor to save and how to make such policies more inclusive     *Full Industry Equilibrium* Arrigo Opocher, Ian Steedman, 2015-05-28 This highly original book develops a systematic zero net profit comparative statics theory of the firm that challenges many widely held views in microeconomics It builds a bridge between the marginalist long run theory of the firm and Sraffian theory to create a unified theoretical framework that explains how firms react to exogenous shocks resulting in new equilibrium positions of the whole economy The central message of the book is that too often economists expect more from the microeconomic laws of input demand and output supply than they can really give The authors show

that the zero net profit condition requires a more articulated analysis that sometimes yields qualitative results contrary to those of familiar economic laws Written for academic researchers and graduate students the book will be of particular interest to those working on the microeconomics of industry equilibrium comparative statics and Sraffian economics

*Ideas on the Move in the Social Sciences and Humanities* Gisèle Sapiro,Marco Santoro,Patrick Baert,2020-04-06 This edited collection analyses the reception of a selection of key thinkers and the dissemination of paradigms theories and controversies across the social sciences and humanities since 1945 It draws on data collected from textbooks curricula interviews archives and references in scientific journals from a broad range of countries and disciplines to provide an international and comparative perspective that will shed fresh light on the circulation of ideas in the social and human sciences The contributions cover high profile disputes on methodology epistemology and research practices and the international reception of theorists that have abiding and interdisciplinary relevance such as Antonio Gramsci Hannah Arendt Karl Polanyi Pierre Bourdieu Michel Foucault Edward Said and Gayatri Spivak This important work will be a valuable resource to scholars of the history of ideas and the philosophy of the social sciences in addition to researchers in the fields of social cultural and literary theory

**An Agency Theory of Dividend Taxation** Raj Chetty,Emmanuel Saez,2007 Recent empirical studies of dividend taxation have found that 1 dividend tax cuts cause large immediate increases in dividend payouts and 2 the increases are driven by firms with high levels of shareownership among top executives or the board of directors These findings are inconsistent with existing old view and new view theories of dividend taxation We propose a simple alternative theory of dividend taxation in which managers and shareholders have conflicting interests and show that it can explain the evidence Using this agency model we develop an empirically implementable formula for the efficiency cost of dividend taxation The key determinant of the efficiency cost is the nature of private contracting If the contract between shareholders and the manager is second best efficient deadweight burden follows the standard Harberger formula and is second order small despite the pre existing distortion of over investment by the manager If the contract is second best inefficient as is likely when firms are owned by diffuse shareholders because of incentives to free ride when monitoring managers dividend taxation generates a first order large efficiency cost An illustrative calibration of the formula using empirical estimates from the 2003 dividend tax reform in the U S suggests that the efficiency cost of raising the dividend tax rate could be close to the amount of revenue raised

*Public Expenditures and Environmental Protection* Gunnar S. Eskeland, 2000 Pigou's conjecture was that under costly taxation public expenditures should not reach the point where marginal benefits equal marginal costs In the treatment here public expenditures and environmental protection may provide public goods for consumption but also collective inputs for production When the benefits are in production the cost of funds is irrelevant Why Collective inputs benefit goods that are taxed while for public goods the shadow price of funds reduces provision as if they were **The WTO and Economic Development** Ben Zissimos, 2024-05-21 Economists offer rigorous quantitative analyses of how the institutional design and purpose of the WTO and its progenitor the GATT affect economic development The World Trade Organization WTO was established partly to support economic development in developing countries through international trade This goal has been elusive with some questioning the WTO's ability to achieve such a goal In this volume leading scholars in the economics of international trade offer rigorous quantitative analyses of how the institutional design and purpose of the WTO and its progenitor the GATT affect economic development The volume begins with analyses of market access concessions that have been or could be exchanged between developing and developed countries from a formal framework for incorporating non tariff measures into a model for analyzing a multilateral trade agreement to an examination of the MFN most favored nation free rider problem Contributors then develop new theoretical and econometric approaches for understanding key aspects of trade liberalization under the GATT WTO that are of particular relevance to economic development considering such topics as achieving cooperation in eliminating prohibitive trade barriers and the effect of China's export subsidies on its dramatic growth in exports Finally the book considers two significant new issues that arose from the Uruguay round from which the WTO was formed the TRIPS agreement regulating intellectual property and the resolution of trade disputes with and without litigation Taken together these analyses shed new light on the relationship between trade liberalization and economic development as well as the WTO's effectiveness **The Palgrave Companion to Harvard Economics** Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists these two

volumes show how economics became established at the University how it produced some of the world's best known economists including Joseph Schumpeter Wassily Leontief and John Kenneth Galbraith and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of Harvard economics
