Control of Complex Systems Karl J. Aström, Pedro Albertos, Mogens Blanke, Alberto Isidori, Walther Schaufelberger, Ricardo Sanz, 2011-06-28 The world of artificial systems is reaching complexity levels that escape human understanding Surface traffic electricity

distribution air planes mobile communications etc are examples that demonstrate that we are running into problems that are beyond classical scientific or engineering knowledge There is an ongoing world wide effort to understand these systems and develop models that can capture its behavior The reason for this work is clear if our lack of understanding deepens we will lose our capability to control these systems and make they behave as we want Researchers from many different fields are trying to understand and develop theories for complex man made systems This book presents research from the perspective of control and systems theory The book has grown out of activities in the research program Control of Complex Systems COSY The program has been sponsored by the European Science Foundation ESF which for 25 years has been one of the leading players in stimulating scientific research ESF is a European association of more than 60 leading national science agencies spanning more than 20 countries ESF covers has standing committees in Medical Sciences Life and Environmental Sciences Physical and Engineering Sciences Humanities and Social Sciences The COSY program was ESF's first activity in the Engineering Sciences The program run for a period of five years starting January 1995
