

2. Remove the thermostat by placing your thumb between the thermostat and wallplate and pulling the thermostat up and away as shown.

If you insert new batteries within 20 to 30 seconds of removing the old batteries, the system retains the current time and day. If the display is blank, the batteries are dead or installed incorrectly. You must reset the time and day. Refer to Setting the Clock section for instructions.

As a precaution when leaving home for longer than a month, change batteries before leaving to prevent the system from shutting down due to lack of power.

Always use fresh alkaline batteries.

Nonalkaline batteries do not last as long; they also can leak, causing damage to the thermostat and the wall surface. Honeywell recommends Energizer® batteries.
