Universal Medical Care from Conception to End of Life Murray Sabrin, PH.D., 2021-08-11 Why has medical care become so complicated and expensive Not very long ago an individual would visit a doctor to be treated for an illness that could not be cured by one of Grandma s recipes Whether it was a sore throat earache or digestive pain Grandma usually had some homespun medicine to deal with a common health issue And if Grandma s medicine chest was not able to deal with a

family member's illness a neighborhood doctor was usually available to treat working families at his office or he would make a house call for a reasonable fee Fast forward to today Is the current system of providing medical care namely through employer based insurance Medicare Medicaid and Obamacare the optimal methods to provide high quality low cost care to all Americans The answer is a resounding no Universal Medical Care from Conception to End of Life The Case for a Single Payer System explains why the current system of employer based insurance and government programs such as Medicare Medicaid and Obamacare are financially untenable and yields less than optimal outcomes for patients Yet there are calls for more top down approaches to medical care most notably by Senator Bernie Sanders who has campaigned for the presidency on a Medicare for All program essentially putting all Americans under one medical umbrella where the government would set all the parameters for medical care Under the individual single payer system outlined in Sabrin's manifesto every American adult would be in charge of his or her medical coverage There would be no more conflicts regarding insurance companies or the government paying for abortion contraception and other controversial medical procedures and medications In a free market every adult the single payer would pay for what he she needs to achieve optimal health
