Decision Making Under Uncertainty, with a Special Emphasis on Geosciences and Education Laxman Bokati, Vladik Kreinovich, 2023-03-21 This book describes new techniques for making decisions in situations with uncertainty and new applications of decision making techniques The main emphasis is on situations when it is difficult to decrease uncertainty For example it is very difficult to accurately predict human economic behavior so in economics it is very important to take this uncertainty into account when making decisions Other areas where it is difficult to decrease uncertainty are geosciences and teaching The book analyzes the general problem of decision making and shows how its results can be applied to economics geosciences and teaching Since all these applications involve computing the book also shows how these results can be applied to computing including deep learning and quantum computing The book is recommended to researchers practitioners and students who want to learn more about decision making under uncertainty and who want to work on remaining challenges

How Uncertainty-Related Ideas Can Provide Theoretical Explanation For Empirical Dependencies Martine Ceberio, Vladik Kreinovich, 2021-03-20 This book shows how to provide uncertainty related theoretical justification for empirical dependencies on the examples from numerous application areas Such justifications are needed since without them practitioners may be reluctant to use these dependencies purely empirical formulas often turn out to hold only in some cases Examples of new theoretical explanations range from fundamental physics quark confinement galaxy superclusters etc and geophysics earthquake analysis to transportation and electrical engineering to computer science image processing quantum computing and pedagogy equity effect of repetitions The book is useful to students and specialists in the corresponding areas Most of the examples use common general techniques so the book is also useful to
