What is Linguistic Evidence?

A text with some value in legal proceedings comes in many different forms to police officers, detectives, private investigators, security specialists, intelligence analysts, attorneys, and private individuals. Some civil disputes are obviously associated with certain types of linguistic evidence, such as trademarks, service marks, and patent applications. In certain criminal scenarios, some forms of linguistic evidence are likewise obvious: a bank robbery note, a threat letter, a suicide note, a ransom note.

SOMETIMES THE LINGUISTIC EVIDENCE IN A CASE IS OBVIOUS, SOMETIMES INVESTIGATORS MUST SEARCH FOR IT

It is clear, from these kinds of documents, that linguistic evidence can play a crucial role in investigating a crime, and the crime with which such a document is associated is also obvious, (although sometimes this kind of document is a red herring to cover up a different kind of crime). For instance, in actual cases, a suicide note has been written to disturb or cover up a murder; a threat letter has been sent in order to mislead investigators away from conspirators. Whether in civil or criminal scenarios, the words themselves are critical pieces of evidence in proving some aspect of the crime or civil trespass.

Other kinds of linguistic evidence are not so well-known, and the crimes or civil actions to which they attach are likewise not so obvious. Blog posts, dating website profiles, handwritten codicils and wills, business emails and memoranda, personal emails within a family or corporation, graffiti sprayed on a shop's wall — these kinds of linguistic evidence can occur in many different crimes or civil and security investigations.

FUNDAMENTAL QUESTIONS ASKED ABOUT LANGUAGE-BASED EVIDENCE

At ILE our research agenda is set for the "four corners of forensic linguistics," (Chaski 2013), to reflect the fundamental questions we have been repeatedly asked about documents relevant to a case. Often the crucial investigative issues are:

1. **Author/Speaker Identification**: Who authored this document? Who spoke this voicemail message?

Casework is designed for investigators and legal practitioners interested in the use of language analysis for investigative or evidentiary purposes as well as for students and researchers wanting to understand how linguistic theory and analysis may be applied to solving real life forensic problems using current best practice   Frames and Constructions in Metaphoric Language Karen Sullivan,2013-01-30 Frames and constructions in metaphoric language shows how linguistic metaphor piggybacks on certain patterns of constructional meaning that have already been identified and studied in non metaphoric language Recognition of these shared semantic structures and comparison of their roles in metaphoric and non metaphoric constructions make it possible to apply findings from Frame Semantics Cognitive Grammar and Construction Grammar to understand how conceptual metaphor surfaces in language   **Intersections of language rights and social justice in the Caribbean context** Clive Forrester,2023-12-10 This volume brings together the work of six authors who explore various dimensions of language rights and how they intersect with social justice in the Caribbean context Language rights advocacy has been an ongoing issue in Caribbean linguistics since at least the 1970s when the Society for Caribbean Linguistics was established and linguists started to turn their attention to the marginalised status of Creole languages in the region This continued into the 1990s when dismal scores in secondary school English resulted in governments singling out Creole languages as the culprit and linguists had to get involved in shaping language policy for territories across the region By 2011 the role of linguists was cemented in the language rights debate with the creation of the Charter on Language Rights in the Creole speaking Caribbean Using examples from Jamaica and St Lucia the current study examines the challenges that still persist ten years after the Charter specifically in the areas of language advocacy linguistic discrimination and communicative hurdles in the courtroom   *Genesis 49 in its Literary and Historical Context* R. de Hoop,2021-11-15 This book deals with the so called Blessing of Jacob Genesis 49 in all its aspects discussing philological literary and historical problems After an introductory chapter a thoroughly discussed translation of Genesis 49 and an analysis of its poetical structure are presented followed by the discussion of the genre definition tribal saying Stammesspruch and a synchronic and diachronic analysis of Genesis 49 in its literary context Gen 47 29 49 33 The remarkable results of this analysis are finally discussed in relation to Israel s history It is suggested that only part of the Blessing functioned within the originally much shorter deathbed account Gen 47 29 49 33 reflecting the historical situation of the time of origin Afterwards it was thoroughly worked up into its present shape to meet the conditions of later political development   **Contemporary Applied Linguistics Volume 2** Li Wei,Vivian Cook,2009-08-23 A comprehensive survey of the ways in which linguistics is being used by researchers in a wide range of interdisciplinary areas   Partitioned Representations J. Dinsmore,2013-03-07 Cognitive science is a field that began with the realization that researchers in varied disciplines psychology artificial intelligence linguistics philosophy formal semantics neuroscience and others had taken on a common set of problems in representation and meaning in reasoning and language Nevertheless cognitive science as a whole enjoys no common methodology or theoretical framework

and is in danger of becoming even more fragmented with time There are two reasons for this First cognitive science is built on existing methodologies that have different historical origins AB a result the psychologist s truth is different from the linguist s truth The artificial intelligence researcher s truth is different from the philosopher s truth The neuroscientist s truth is different from the formal semanticist s truth All too often there is little or no recognition of the relevance of work in other disciplines to one s own concerns Second cognitive scientists tend to develop theories around isolated problems For instance there are theories about how humans categorize concepts about how humans analyze linguistic expressions syntactically about how the English tense system works semantically about how humans reason about space or reason about time about how goal directed problem solving occurs about how the brain computes and so on *The Language of Desire* Daniel Eggers,2021-06-08 Expressivism has been dominating much of the metaethical debate of the past three decades The aim of this book is to address a number of questions that have been neglected in the previous discussion These primarily concern the psychological commitments and the methodological status of expressivism as well as important differences and similarities between the approaches of the classic expressivists Ayer Stevenson Hare Blackburn und Gibbard *The Oxford Handbook of Archaeology and Language* Martine Robbeets,Mark Hudson,2025-06-09 This volume provides a comprehensive and up to date overview of how archaeology genes and language can be combined to shed light on the human past Our understanding of human prehistory has been revolutionized in recent years by the growth of interdisciplinary perspectives and particularly by insights from the study of ancient DNA At a time when the Big Data movement in genetics and archaeology is beginning to make inroads into linguistics The Oxford Handbook of Archaeology and Language sets the agenda for future research in the discipline of archaeolinguistics The handbook is divided into three parts The first part introduces the basic frameworks of archaeolinguistics addressing recent trends and new perspectives Chapters in Part II explore the application of archaeolinguistics to different stages in human history from hunter gathering via the adoption of farming and the rise of writing to modern times Part III features regional case studies from different parts of the world including not only Indo European but also Uralic Transeurasian Sino Tibetan Paleosiberian Tai Kadai Austronesian Papuan Australian Afrasian Nilo Saharan Niger Congo Kalahari Basin Andean and Lowland South American languages In illustrating the extent to which linguistic archaeological and genetic histories align or differ the volume goes beyond the level of broad brush approaches by engaging specialists from a range of disciplines as co authors shedding light on language dynamics from multiple perspectives **The End of the Early Bronze Age in the Aegean** Gerald Cadogan,2023-08-21

Linguistic Stratigraphy Matthias Urban,2023-11-29 This book examines the historical linguistic panorama of Western South America focusing on the minor languages that were partially or fully replaced by the expansion of the Quechuan family through the region The author presents a coherent and generally applicable framework for studying prehistoric language shift processes and reconstructing earlier linguistic landscapes before significant language spreads ousted former patterns of

linguistic diversity This framework combines toponymic evidence with the analysis of substrate contact effects and in some cases extralinguistic evidence to create an integrated if incomplete of extinct and undocumented languages In an authoritative exploration of case studies concerning Aymara in parts of Southern Peru Ca ar in Ecuador and Chacha in Northern Peru the book shows how the identities of lost languages and earlier linguistic panoramas can be reconstructed
