The Apocalypse of Enoch and Bhu unda The Apocalypse of Enoch and Bhu unda challenges the underlying assumptions of the classical roots of civilization by restoring the original context of creation mythology In this second volume of A Chronology of the Primeval Gods and the Western Sunrise ancient myths from multiple geographies are correlated to spikes in cosmic rays over the past

120 000 years as documented in ice core data The chronology and content of these myths tell us that the primary forces behind these cataclysms were the most ancient gods hyper nova at the Galactic Center associated with Sgr A The Dragon Sgr West The Beast and Sgr East Hirany ksha and Hiranyakas ipu with secondary supernova seen as the birth of new destructive gods Ancient myth has documented the cataclysmic destruction of the world on at least twenty occasions with four major geo polar migrations which has resulted in a shift of the earth s equator on at least one occasion Multiple myths are shown to represent a view of the sky that can only be seen from the Antarctic region Multiple versions of the myths of Orion are analyzed showing clear linkages between the Vedic myth of Trisanku the Book of Genesis Senmut s Tomb and the myths of Prajapati Daksa representing the oldest version of the Orion myth older than Trishanku and Genesis by 20 000 years The stunning conclusion explains how the Watchers of Enoch were the Vedic descendants of Ila and Ikshvaku These descendants of the seventh Manu had been observing and recording the stars as a source of cataclysm for at least 15 000 years prior to Enoch thus allowing Enoch to prophesize a new heaven That prophecy became the foundation for St John s Book of Revelations which is shown to be a description of a series of cataclysms attributed to Sgr West The book offers a new theory for explaining geo polar migration That theory suggests small shifts in the location of the earth s center of gravity underlie each migration but that there are multiple causes for the shifts *Vrikshayurveda* Avinash Khair, 2025-08-01 Since the evolution of unicellular organisms the skill of eating for survival has reached different levels contributing to a happier healthier and more peaceful existence for both flora and fauna In this process scientific principles have been applied In the Indian context the science of human health is known as Ayurveda The Sanskrit word Ayur means life and Veda means knowledge or science Thus Ayurveda refers to the science of health or the science of life The Sanskrit word for tree is Vriksha When combined with Ayurveda the term becomes Vrikshayurveda which translates to the science of tree life Plants which serve as a major source of food and medicine for humans were studied using the principles of Ayurveda and these findings were recorded as Vrikshayurveda This book aims to encourage readers to think and act courageously in finding new avenues to create a happy healthy and peaceful life for both humans and plants so that plants in turn can provide the same benefits to mankind carrying forward the legacy of our ancestors At the same time readers must keep in mind that the knowledge passed down from our ancestors is time tested truly scientific and unbiased In this regard M J Filliozat Professor at the Coll ge de France states in the Journal of World History that Research in ancient India led very early to the development of theories which although ahead of their time were nevertheless logical systems of thought about the structure of reality that is to say of science His observations specifically refer to astronomy and physiology as discussed in texts dating between 1500 BC and 500 BC This statement is also applicable to Vrikshayurveda as both astronomy and plant physiology are important components of it Further research based on the principles of Vrikshayurveda is essential because if the future of mankind is organic then its foundation lies in Vrikshayurveda *Mahabharata Book Three (Volume 4)* ,2017-12-01

Slender lady I came out with you to gather fruit I got a pain in my head and fell asleep in your lap Then I saw a terrible darkness and a mighty person If you know then tell me was it my dream Or was what I saw real So speaks Satyavat newly rescued from the god of death by Savitri his faithful wife at the heart of one of the best loved stories in Indian literature This and other well known narratives including a version of Rama s story bring the Forest Book of the great Sanskrit epic the Maha bh rata to its compelling conclusion Woven into the main narrative of the Pandavas exile these disparate episodes indicate the range and poetic power of the Maha bh rata as a whole a power that has the potential to speak to common human concerns across cultures and centuries The Forest is Book Three of the Maha bh rata The Great Book of India This final quarter of the account of the P ndavas twelve year exile in the forest contains four stirring stories that are among the best known in Indian literature From a hero overcoming great odds to a virtuous wife who rescues her family and Indra tricking Karna and Yudhi shthira s victory in the verbal contest with the tree spirit these stories speak to common human concerns across cultures and centuries Co published by New York University Press and the JJC Foundation For more on this title and other titles in the Clay Sanskrit series please visit <http://www.claysanskritlibrary.org> *Tracing the Literary and Symbolic Significance of the Messenger through History* Mohan Gopinath,2023-11-20 This book is a unique study of how the role of the messenger has changed throughout history starting from ancient times and ending with the person s role today The chapters include an analysis of the personal characteristics required by a messenger the dangers they often have to face especially in troubled times and how they have the power to change the course of history because of their functions The book analyses various types of messengers who were and are still significant and ends by looking at how the role will continue to develop and change taking technological advances into account The book in short is unusual captivating and will be of interest to an informed general readership and academics of various disciplines Of particular interest will be the analysis the book provides of the messengers we send into space in search of life and the potential messengers who will visit our planet in the future *Archaeology of Logic* Andrew Schumann,2023-04-27 The question arises whether logic was given to us by God or whether it is the result of human evolution I believe that at least the modus ponens rule A and if A then B implies B is inherent in humans but probably many other modern systems e g resource logic non monotonic logic etc are the result of humans adapting to the environment It is therefore of interest to study and compare the way logic is used in ancient cultures as well as the way logic is going to be used in our 21st century This welcome book studies and compares the way formation of logic in three cultures Ancient Greek 4th century B C Judaic 1st century B C 1st century A D and Indo Buddhist 2nd century A D The book notes that logic became especially popular during the period of late antiquity in countries covered by the international trade of the Silk Road This study makes a valuable contribution to the history of logic and to the very understanding of the origins and nature of logical thinking Prof Dov Gabbay King s College London UK Andrew Schumann in his book demonstrates that logic step by step arose in different places and cultural circles He argues that if we apply a

structural genealogical method as well as turn to various sources particularly religious philosophical linguistic etc then we can obtain a more general and more adequate picture of emergence and development of logic This book is a new and very valuable contribution to the history of logic as a manifestation of the human mind Prof Jan Wolenski Jagiellonian University Poland The author of the Archaeology of Logic defends the claim calling it logic is after all which sees logical competence as a practical skill that people began to learn in antiquity as soon as they realized that avoiding cognitive biases in their reasoning would make their daily activities more successful The in depth reading of the book with its diving into the comparative quotations in the long dead or hardly known to most of us languages like Sumerian Akkadian Aramaic Hebrew and etc will be rewarded by the response that the logical competence is diverse and it can be trained despite the inevitability of the reasoning fallacies and that critical discussions and agonial character of the social life are the necessary tools for that Prof Elena Lisanyuk
