Simple Tasks to Keep Your Motor Running

Changing the Oil

Tools Needed:

Estimated Time:

Universal Pliers

Adjustable Socket Wrench

Drain Pan

Funnel

Oil Rag or Cloth

Fresh Oil

Fresh Filter

45 Minutes

- 1 Either run your motorcycle or take it for a 10-minute drive to warm it up. This will make the oil to drain faster.

- 2 Clean the area of dust, dirt, and other airborne contaminants. If they get into your fresh oil, they can damage your engine.

- 3 Find a flat surface and either angle your bike on a stand or let it rest on its kickstand.

- 4 Place the drain pan where you believe it will catch the most oil. You may have to adjust it later.

- 5 Locate the drain plug. On a dry sump, it will be on the sump. If you have a wet sump, there might be one on the frame and another on the engine - you'll need to locate both in that case. You may need to remove some parts of the motorcycle, such as the foot peg, or you may need to drop the exhaust to access the drain plug.

- 6 Remove the oil port intake cap to make the oil drain out quickly.

- 8 Remove the oil filter. It may be that the filter is on the frame and can be simply slid out after its cover is undone. If it is on the engine, consult your owner's manual for details.

- 9 Wet the new filter with a bit of fresh oil.

- 10 Use a clean cloth to clean the area that the filter will be reattached to.

- 11 Replace the filter and the parts that you took off to remove the old one.

- 13 Open your oil port and fill it with the right amount and weight of oil specified by your owner's manual. Be careful not to overfill it! Level with a dipstick or some other device having viewing windows.

- 12 Replace the drain plug and the rest of the parts you have removed or adjusted once all of the old oil is drained.

- 14 Recycle the used oil.

- 15 Change your oil again every 2,500 to 4,000 miles (or whatever is recommended in your manual).

Changing the Air Filter

Tools Needed:

Estimated Time:

Adjustable Socket Wrench

Compressed Air Blower

Screwdriver

Fresh Air Filter

45-60 Minutes

- 1 Depending on the type of oil, your air filter may be easily accessible near the side of the engine, or it may be located underneath the fuel tank.

- 2 If the filter is located on the side of the engine, undo the cover and slip it off.

- 4 Make sure your petcock is turned to the off position if you'll be removing the gas tank.

- 5 Unbolt the tank and undo any wires and hoses connecting it to the rest of the bike. Label these wires and hoses to ensure easy reassembly. Make sure not to spill fuel everywhere!

- 6 Cover the top of the air box with a clean rag or covering to keep it clean inside.

- 8 Replace the filter where you found it and re-install everything. When replacing the filter, make sure that it is oriented to allow air to flow through it.

Explorative Guide on Motorcycle Maintenance Cuthred E a Ivar, 2023-11-27 There is a huge difference between having the bolt and a few aftermarket parts on a motorcycle and building a custom motorcycle. Building a custom motorcycle requires the ability to design something unique but also have the skill to build it. That often means you will need a few things that will enable you to fabricate parts from raw materials or modify existing parts to suit your needs. Mastering every skill needed to make a custom motorcycle could take a lifetime. However, there are a few small skills that will let you make the bulk of the work yourself. Whether you're looking to build a custom motorcycle or simply build your dream bike, having the skills will help keep your costs down and guarantee a superior result. So, you want to be a custom bike builder. The best motorcycle builder when building your first bike is to have more confidence in yourself. That may be some of the best advice on the bicycle. You would be surprised how many people build custom bikes. Not everybody is a designer and many of them come from completely different backgrounds and environments. Custom motorcycle builders have a different skillset. Just like a musician, a custom bike builder tends to have their own workflow and things. On the way for the first time, it started with me. If you have no interest in building your own custom bike, you have to know more of the common custom bike building process and the tools for you to work on and build your own custom motorcycle. Builders have their own little bits of other things, just riding. One of the best would be building a custom motorcycle. The amount of satisfaction and gratitude when you assembled something that came in pieces and put it on your bike. You don't have to be a professional to have discipline and the ability to work through all the challenges and frustration to move with the end result. God bless, I bet you don't feel happy when the bike finally makes it with its deal.
