that's just a small taste of all the disruptions we've enjoyed thanks to the internet. One of the biggest disrupted industries and one of those that provides a great path to a solid making money online venture for an individual entrepreneur is in book publishing. Specifically publishing and selling ebooks online. You see what the big publishing houses do with big offices of editors, writers, administrative staff, and then big printing presses, then distribution centers to get their books out to bookstores around the country, all to hopefully get books in the hands of customers, you can do on the computer, you have right now. If that's not massive disruption, I don't know what is. With all the red tape, play to pay tactics, and the lack of marketing support from the big publishing houses along with low royalties, many are finding that self-publishing is a much better option and in most cases a more profitable option. There are some key differences between this self-publishing which by the way doesn't have the negative connotations it used to and the traditional publishing process. You won't be dealing with printed books for one. That eliminates the expense and hassle of actually creating books, storing them, and delivering them, and that may not even sell. It's going to be all digital. These are ebooks which can be read on devices like Amazon's Kindle, on another tablet or smartphone, or even on a computer. From humble beginnings, ebooks now sell in the millions each year, representing about 20 percent of the publishing market in the United States. Industry watchers say that by 2018, ebook revenues will reach over 8 billion per year. And there is plenty of room for a one-person ebook entrepreneur to get a piece of that market. So let's take a look at how you can make money with ebooks from the brainstorming to the writing and most importantly, the marketing and selling of your ebooks online. So take a look at this book and see what interests you.
