Making Decisions Making Decisions:

Making Decisions That Matter Kathleen M. Galotti, 2005-08-22 Researchers studying decision making have traditionally studied the phenomenon in the laboratory with hypothetical decisions that may or may not involve the decision maker's values, passions, or areas of expertise. The assumption is that the findings of these well-controlled laboratory studies will shed light on the important decisions people make in their everyday lives. This book examines that assumption. The volume begins by covering four basic phases of decision making: setting or clarifying goals, gathering information, structuring the decision, and making a final choice. Comprehensive reviews of existing literature on each of these topics is provided. Next, the author examines differences in decision making as a function of several factors not typically discussed in the literature: the type of decision being made (e.g., legal, medical, moral) and the existence of individual differences in the decision maker (developmental differences, individual differences in style or temperament, differences as a function of expertise). The author then examines the topic of group decision making, contrasting it with individual decision making. The volume concludes with some observations and suggestions for improving people's everyday decision making. This book is intended for use as a core textbook or supplement for courses in psychology, education, or allied disciplines. It will also be an invaluable resource for people who work with people making decisions in various applied settings, such as schools, universities, and health care centers.

Making Decisions Robert Heller, 1999 The four new guides in this best-selling series are ideal for managers at every level. These compact references, the most accessible single-subject business guides on the market, demonstrate techniques and skills useful in any work environment.

Decisive Chip Heath, Dan Heath, 2013-03-26 Chip and Dan Heath, the bestselling authors of *Switch* and *Made to Stick*, tackle one of the most critical topics in our work and personal lives: how to make better decisions. Research in psychology has revealed that our decisions are disrupted by an array of biases and irrationalities. We're overconfident. We seek out information that supports us and downplay information that doesn't. We get distracted by short-term emotions. When it comes to making choices, it seems our brains are flawed instruments. Unfortunately, merely being aware of these shortcomings doesn't fix the problem any more than knowing that we are nearsighted helps us to see. The real question is: How can we do better? In *Decisive*, the Heaths, based on an exhaustive study of the decision-making literature, introduce a four-step process designed to counteract these biases. Written in an engaging and compulsively readable style, *Decisive* takes readers on an unforgettable journey from a rock star's ingenious decision-making trick to a CEO's disastrous acquisition to a single question that can often resolve thorny personal decisions. Along the way, we learn the answers to critical questions like these: How can we stop the cycle of agonizing over our decisions? How can we make group decisions without destructive politics? And how can we ensure that we don't overlook precious opportunities to change our course? *Decisive* is the Heath brothers' most powerful and important book yet, offering fresh strategies and practical tools enabling us to make better choices. Because the right decision at the right moment can make all the difference.

Decisions Without Mistakes Kim Ward, 2003-01-06 I've been in management leadership supervision and directorship whatever everyone is calling it this week all of my adult life As I'm sure so have many of you Whether we were appointed anointed or the last person standing makes no difference the responsibilities of the job are the same we're expected to be successful with our team Our life as soon as we receive the responsibility can become a barrage of meetings telephone calls e-mails paperwork reports customer complaints issues concerns and downright problems Isn't management leadership supposed to be a promotion and honor Wow This book is a very small distillation of some common sense principles attitudes strategies and techniques that thousands have worked with me to develop during my career as a trainer and consultant I've witnessed researched and experienced the ever-changing work environment and the outcome is a management leadership process that is proven to work in today's interesting and challenging business setting This book is a part of that process The content in these pages can help any manager leader develop better business relationships build more powerful teams achieve higher goals reduce stress in themselves and others but most importantly make Decisions Without Mistakes **Effective Decision Making** Jeremy Kourdi, 2011 Decisions and problems can often leave people with a dilemma knowing that a decision is required but uncertain how to ensure that it is the best one and that it will be successfully executed The paradox is that the very pressure for a decision often breeds indecisiveness Think on Your Feet addresses this fundamental problem enabling you to find the best solutions and options avoid pitfalls managerisk work with people to ensure that decisions succeed and understand how you can improve the way you typically operate when making decisions Practical Decision Making in Health Care Ethics Raymond J. Devettere, 2009-12-04 For nearly fifteen years Practical Decision Making in Health Care Ethics has offered scholars and students a highly accessible and teachable alternative to the dominant principle-based theories in the field Devettere's approach is not based on an ethics of abstract obligations and duties but following Aristotle on how to live a fulfilled and happy life in short an ethics of personal well-being grounded in prudence the virtue of ethical decision making This third edition is revised and updated and includes discussions of several landmark cases including the tragic stories of Terri Schiavo and Jesse Gelsinger the first death caused by genetic research Devettere addresses new topics such as partial birth abortion law embryonic stem cell research infant euthanasia in The Netherlands recent Vatican statements on feeding tubes organ donation after cardiac death new developments in artificial hearts clinical trials developed by pharmaceutical companies to market new drugs ghostwritten scientific articles published in major medical journals and controversial HIV/AIDS research in Africa This edition also includes a new chapter on the latest social and political issues in American health care Devettere's engaging text relies on commonsense moral concepts and avoids academic jargon It includes a glossary of legal medical and ethical terms an index of cases and thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading It is a true classic brilliantly conceived and executed and is now even more valuable to undergraduates and graduate students medical students health care professionals hospital ethics
