against development in Gujarat India succeeded to varying degrees due to legalism from below and translocal solidarity but that success has been compromised by its gendered geographies Based on extensive field research this book examines the reasons for the three social movements success It analyses the contradictory reality of the deepening of democracy along with coercive state measures in the era of neoliberal development the importance of the legal changes in the state the nature of the local fields of protest and the translocal field of protest in contemporary subaltern protests Addressing gender inequalities within and outside the struggle the author shows that despite subaltern women having symbolic visibility in the public spaces of the struggles such as rallies protests and meetings with government officials they are absent from the private spaces of decision making and collective dialogues This book offers a new approach on the politics of social movements in contemporary India by discussing the nuanced relationship between development and democracy social justice and gender justice It will be of interest to academics in the field of Development and Gender studies Studies of social movements and South Asian Studies *Translating International Women's Rights* Susanne Zwingel, 2016-08-13 This book looks at the centerpiece of the international women's rights discourse the Convention on the Elimination of all Forms of Discrimination against Women CEDAW and asks to what extent it affects the lives of women worldwide Rather than assuming a trickle down effect the author discusses specific methods which have made CEDAW resonate These methods include attempts to influence the international level by clarifying the meaning of women's rights and strengthening the Convention's monitoring procedure and building connections between international and domestic contexts that enable diverse actors to engage with CEDAW This analysis shows that while the Convention has worldwide impact this impact is fundamentally dependent on context specific values and agency Hence rather than thinking of women's rights exclusively as normative content Zwingel suggests to see them as in process This book will especially appeal to students and scholars interested in transnational feminism and gender and global governance **Global Civil Society and Transversal Hegemony** Karen Buckley, 2013-05-29 There has been clear recognition of tendencies towards uncritically celebrating resistance and the need for critical appraisal within the literature on globalization and contestation This book provides a conceptual history of global civil society and a critical examination of the politics of resistance in the global political economy It uses a dialectical method of analysis to illustrate the conceptual stasis of mainstream approaches to questions of globalization and contestation while demonstrating the potential of a Gramscian approach to reconstitute hegemony as a key analytical and explanatory tool Buckley offers insight to the movements of transversal hegemony and existent and anticipated modes of social relation through the case studies of the World Social Forum and the World People's Conference on Climate Change Offering a more comprehensive understanding of change in the global political economy this book will be of interest to students and scholars of international political economy globalization global civil society sociology and the politics resistance Rethinking Gender Equality in Global Governance Lars Engberg-Pedersen, Adam Fejerskov, Signe Marie Cold-Ravnkilde, 2019-04-26 A

Penelope Andrews, 2016-04-15 Using her experience of living under apartheid and witnessing its downfall and the subsequent creation of new governments in South Africa the author examines and compares gender inequality in societies undergoing political and economic transformation By applying this process of legal transformation as a paradigm the author applies this model to Afghanistan These two societies serve as counterpoints through which the book engages in a nuanced and novel way with the many broader issues that flow from the attempts in newly democratic societies to give effect to the promise of gender equality Developing the idea of conditional interdependence the book suggests a new approach based on the communitarian values which underpin newly democratic societies and would allow women s rights to gain momentum and reap greater benefits Broad in its thematic approach the book generates challenging and complex questions about the achievement of gender equality It will be of interest to academics interested in gender and human rights international and comparative law
