**Individuals as Producers of Their Own Development** Richard M. Lerner, 2021-03-30 In the World Library of Psychologists series international experts present career long collections of what they judge to be their most interesting publications extracts from books key articles research findings and practical and theoretical contributions Professor Richard M Lerner has been prominent in the application of developmental science across the life span for half a century investigating dynamic relational development systems and their potential impact on positive youth development PYD and social justice In this collection Professor Lerner presents the development of his theory of and research about relations between life span human development and contextual or ecological change exploring the mutually influential relations between humans and their peer family school and community contexts Including a specially written introduction in which Professor Lerner reflects on the importance of mentorship and contextualises both the field and the evolution of his wide ranging career this collection will be a valuable resource for students and researchers of developmental psychology

**Child and Adolescent Psychology** Stephen von Tetzchner, 2018-10-26 Child and Adolescent Psychology provides an accessible and thorough introduction to human development by integrating insights from typical and atypical development. This integration cements understanding since the same processes are involved. Knowledge about atypical development informs the understanding of typical development and knowledge about typical development is a necessary basis for understanding atypical development and working with children with disorders. Based on international research and informed by biological, social, and cultural perspectives, the book provides explanations of developmental phenomena with a focus on how children and adolescents at different age levels actually think, feel, and act. Following a structure by topic with chronological developments within each chapter, von Tetzchner presents and contrasts the major theoretical ideas in developmental psychology and discusses their implications for different aspects of development. He also integrates information about sensory, physical, and cognitive disabilities and the main emotional and behavioral disorders of childhood and adolescence and the developmental consequences of these disabilities and disorders. Child and Adolescent Psychology is accompanied by online resources for lecturers and students to enhance the book, including essay questions for each chapter, Powerpoint slides, and multiple choice questions. The book and companion website will prove invaluable to developmental psychology students.
