Seen from a planner's point of view, this book provides insights into current methods and also gives details of new research. Methods are given for the analysis and modelling of the capacity, quality and economics of the service offered to users and includes illustrative analytical and simulation models of the systems operations supported by an appropriate analysis of real world events and applications. Undergraduates and graduates in the field of air transport planning and technology, applied operations research and applied transport economics will find this book to be of interest, as will specialists involved with transport institutes and consulting firms, policy makers dealing with air transport and the analysts and planners employed at air transport enterprises.

Unconventional and Community Transport in the United Kingdom Stephen D. Nutley, 1990 Nutley argues that transport policy in the UK has suffered from a lack of consensus since 1945 and that its development has been frustrated by periodic reorganizations under political direction that favors private transportation the official view being that public transportation is a financial burden rather than an essential piece of social infrastructure He outlines progress and setbacks and makes recommendations for future developments to meet the public s needs Book club price 57 Annotation copyrighted by Book News Inc Portland OR
