pH of the Skin: Issues and Challenges Christian Surber,Christoph Abels,Howard Maibach,2018-08-21 The concept of expressing acidity as the negative logarithm of the hydrogen ion concentration was defined and termed pH in the beginning of the 20th century The general usefulness of the pH concept for life science was recognized and later gained importance to analytical research Reports on results of pH measurements from living skin established the term acid mantle the skin s own protective shield that maintains a naturally acid pH It is invisible to the eye but crucial to the overall wellbeing of skin Chronic alkalization can throw this acid mantle out of balance leading to inflammation dermatitis and atopic skin diseases It is therefore no surprise that skin pH shifts have been observed in various skin pathologies It is also obvious that the pH in topically applied preparations may play an important role Optimal pH and buffer capacity within topical preparations not only support stability of active ingredients and auxiliary materials but may also increase absorption of the non ionized species of an acidic or a basic active ingredient They may even open up opportunities to modify and correct skin pH and hence accelerate barrier recovery and maintain or enhance barrier integrity Further efforts are needed to standardize and improve pH measurements in biological media or pharmaceutical cosmetic

vehicles to increase and ensure quality comparability and relevance of research data In this volume we present a unique collection of papers that address past present and future issues of the pH of healthy and diseased skin It is hoped that this collection will foster future efforts in clinical and experimental skin research **Textbook of Cosmetic Dermatology** Robert Baran,Howard I. Maibach,2024-10-31 This text documents the science that lies behind the expanding field of cosmetic dermatology so that clinicians can practice with confidence and researchers can be fully aware of the clinical implications of their work New chapters have been added to this edition on skin bioengineering skin imaging sunscreens gel nail polish management of hair loss cosmetics and moisturizers in acne management cryolipolysis and radiofrequency for minimally invasive body contouring amongst others and chapters have been updated throughout to keep this at the forefront of work and practice The Series in Cosmetic and Laser Therapy is published in association with the Journal of Cosmetic and Laser Therapy **Introduction to Cosmetic Formulation and Technology** Gabriella Baki,Kenneth S. Alexander,2015-03-12 Designed as an educational and training text this book provides a clear and easily understandable review of cosmetics and over the counter OTC drug cosmetic products The text features learning objectives key concepts and key terms at the beginning and review questions and glossary of terms at the end of each chapter section Overviews functions product design formulation and development and quality control of cosmetic ingredients Discusses physiological pharmaceutical and formulation knowledge of decorative care products Reviews basic terms and definitions used in the cosmetic industry and provides an overview of the regulatory environment in the US Includes learning objectives key concepts and key terms at the beginning and review questions and glossary of terms at the end of each chapter section Has PowerPoint slides as ancillaries downloadable from the book s wiley com page for adopting professors **Federal Register** ,1999-04-06 **Advances in Composite Materials** Pavla Tesinova,2011-09-09 Composites are made up of constituent materials with high engineering potential This potential is wide as wide is the variation of materials and structure constructions when new updates are invented every day Technological advances in composite field are included in the equipment surrounding us daily our lives are becoming safer hand in hand with economical and ecological advantages This book collects original studies concerning composite materials their properties and testing from various points of view Chapters are divided into groups according to their main aim Material properties are described in innovative way either for standard components as glass epoxy carbon etc or biomaterials and natural sources materials as ramie bone wood etc Manufacturing processes are represented by moulding methods lamination process includes monitoring during process Innovative testing procedures are described in electrochemistry pulse velocity fracture toughness in macro micro mechanical behaviour and more **HERBAL DRUG TECHNOLOGY (THEORY AND PRACTICALS): A TEXT BOOK OF HERBAL DRUG TECHNOLOGY** MR. ALOK SEMWAL,SUMEL ASHIQUE,MS. USHA SINGH,DR. SACHIN TYAGI,MR. AAKASH UPADHYAY, This book is a robust attempt to furnish the latest scientific information for any multidisciplinary research team engaged in plant drug research It focuses
