

Congratulations...

You now own a quality portable HEPA air cleaner that has been engineered and crafted for your satisfaction.

Honeywell air cleaners incorporate a true HEPA filter. HEPA is an acronym for *High Efficiency Particulate Air*.

Our Consumer Relations representatives will be pleased to help with any questions or concerns you may have about your **Honeywell** air cleaner. Please call our Consumer Relations Dept. at (800) 332-1110 for assistance.

For Best Performance...

We recommend that you operate your **Honeywell** air cleaner 24 hours a day because indoor air can be quickly contaminated by activity in a room and infiltration of outside air. While all the air in a room will not be processed by the air cleaner, the more air circulated through the filter, the more filtered air returned to the room. Portable air cleaners will be much more effective in rooms where all doors and windows are closed.

For models that include a CPZ™ odor and gas adsorbing filter (17250 and 17450 series), carefully remove the plastic bag which protects the CPZ™ filter during shipment before operating your air cleaner. Your air cleaner will not operate properly with the plastic bag in place, and it may damage the air cleaner. The plastic bag may contain small particles and dust caused by vibration of the CPZ™ filter during shipment. Use care to avoid soiling clothing, carpets and other furnishings with the particles or dust.

The **Honeywell** HEPA air cleaner can be placed on the floor in almost any location. However, for best performance the air outlet slot should not be blocked for at least 3 feet (1 meter) in all directions.

Due to the large volume of air drawn towards the air cleaner, surrounding areas should be cleaned and/or vacuumed frequently to prevent build up. This may help keep your home cleaner and may extend the life of your prefilter. If the unit is placed on a light colored carpeting, a small mat or rug should be used to ease cleaning and prevent any permanent staining. This is particularly important in homes with heavier contamination from smoking or fireplaces.

Construction...

Your **Honeywell** air cleaner has five basic components: the locking mechanism, the endcap, the HEPA filter, the activated carbon pre-filter, and the base assembly (with controls and motor).

Models 17250, 17450 Series
Your **Honeywell** air cleaner has six basic components: the locking mechanism, the endcap, HEPA filter, CPZ™ odor and gas adsorbing filter, activated carbon pre-filter, and the base assembly (with controls and motor).
