CM907 / CM901 Wireless Programmable
Room Thermostat & BDR901 Relay Box

Description

The Honeywell CM900 Wireless (CM907 or CM901) is a modern wireless programmable room thermostat based on Honeywell's proven programming philosophy. To further improve the ease of use, this product includes an extra large LCD display with backlighting and LoT[®] Technology to assist customers during daily use.

The CM907/901 room thermostat communicates with the BDR901 Relay Box on an 868MHz Radio Frequency (RF) band to control a single heating system component such as a boiler, pump or zone valve. Neither product will communicate with other RF products that use different frequencies or communication protocols.

*Note: The RF link between the individual room thermostat (CM907/901) and Relay Box (BDR901) in system packs provided by Honeywell is pre-configured at the factory and therefore SHOULD be installed at the same site. This makes the installation process fast and easy but if products from individual system packs are separated, or mixed with other pre-configured system packs during installations please refer to section 5.7 **Binding/Rebinding Procedure** to bind the desired units together and allow them to communicate with each other.*
