

Daily Diabetes Meal Planning Guide

A daily meal plan is an important part of your diabetes management, along with physical activity, blood sugar (glucose) checks and, often, diabetes medications.

There is no one meal plan that works for everybody with diabetes. This guide provides you with information that may help you plan your meals, including:

- **Balance Your Plate:** Many people with diabetes like to keep meal planning simple. This eating plan can help you easily portion out your food.
- **A Handy Guide to Portion Sizes:** Quick tips for estimating portion sizes
- **Food Lists for Meal Planning:** If you want to count servings of food and follow a plan that is good for your diabetes too, use this tool to help you figure out how many carbohydrates, proteins, and fats are a good amount for you.
- **Carbohydrate Counting:** There are many foods with carbohydrates to enjoy, including grains, fruits, vegetables, milk products and even those with sugar. Carbohydrates raise your blood sugar level more than proteins and fats. This meal planning approach helps you keep track of how many carbohydrates you eat in your meals and snacks. Many people who take insulin like to use this plan.

Dietary Guidelines at a Glance:

- Balance your calories to manage your weight
- Increase your intake of nutrient-dense foods such as fruits, vegetables, whole grains, low-fat dairy and protein, and healthy fats/oils
- Reduce your intake of sodium, fats, added sugars, refined grains and alcohol
- Build healthy eating patterns

Checking your blood sugar as directed by your healthcare provider will help you to see how your food choices affect your blood sugar control.

A registered dietitian (RD) can help you make a meal plan that best meets your needs and lifestyle. Ask your healthcare provider, certified diabetes educator (CDE), hospital, or local diabetes association for the names of RDs in your area who work with people who have diabetes or find an RD at www.eatright.org.
