Greene, 1991 **LIMDEP Abridged User's Manual** William H. Greene, 1991 **Computational Econometrics** Charles G. Renfro, 2004 This publication contains a substantial amount of detail about the broad history of the development of econometric software based on the personal recollections of many people For economists the computer has increasingly become the primary applied research tool and it is software that makes the computer work *LIMDEP User's Manual* William H. Greene, 1998 *Palgrave Handbook of Econometrics* Terence C. Mills, Kerry Patterson, 2009-06-25 Following these seminal Palgrave Handbook of Econometrics Volume I this second volume brings together the finest academics working in econometrics today and explores applied econometrics containing contributions on subjects including growth development econometrics and applied econometrics and computing When the Stakes Are High Vesna Danilovic, 2010-06-04 When the Stakes Are High is based on the premise that powers have continually played a decisive role in international conflicts Consequently one of the key questions concerns the conditions that are likely to trigger or abate dispute escalation into major power conflicts In this book Vesna Danilovic provides a rigorous theoretical and empirical analysis of these conditions Since the most precarious and common form of dispute between major powers arises over third nations the author's primary focus is on so called extended deterrence In this type of deterrence one side attempts to prevent another side from initiating or escalating conflict with a third nation When the Stakes Are High addresses such questions as When is extended deterrence likely to be effective What happens if deterrence fails In what circumstances is war likely to result from a deterrence failure The author's main argument is that a major power's national interests which shape the inherent credibility of threats and which are shaped by various regional stakes set the limits to the relevance of other factors which have received greater scholarly attention in the past Strongly supported by the empirical findings the arguments in this work draw important implications for conflict theory and deterrence policy in the post Cold War era This book will appeal to the reader interested in international relations in general and in theories of international conflict deterrence causes of wars great power behavior and geopolitics in particular Vesna Danilovic is Assistant Professor of Political Science Texas A M University *Dynamics of Organizational Populations* Michael T. Hannan, Glenn Carroll, 1992 This study aims to broaden the general understanding of change in organizational populations by examining the dynamics of numbers of organizations in populations The authors examine labour unions newspapers publishing brewing firms life insurance companies and banks Point Blank Gary Kleck, 2017-07-12 By 1990 there were approximately 200 million guns in private hands in the United States and around half of American households contained a gun Over 30 000 people a year are

killed with guns in suicides homicides and accidents and Americans use guns for defensive purposes as many as a million times a year There is little doubt that gun violence and control are issues of vital importance and they continue to inspire national debate It is doubtful however that most gun debates are worth listening to Not surprisingly they generally leave their participants exactly where they began with their biases intact and onlookers perplexed Written deliberately to counter an atmosphere of hysteria and extremism Point Blank now in paperback offers logical argument supported by empirical information It confronts fundamental questions head on On its initial publication in 1993 Point Blank won the Michael J Hindelang Award of the American Society of Criminology for the book that made the most outstanding contribution to criminology Point Blank reports both original research and assesses existing evidence drawn from a wide variety of academic disciplines including criminology sociology law and medicine
