Russian Architecture and the West Dmitrii Olegovich Shvidkovskii, Shvidkovsky, 2007-01-01 This is the first book to show the development of Russian architecture over the past thousand years as a part of the history of Western architecture Dmitry Shvidkovsky Russia's leading architectural historian departs from the accepted notion that Russian architecture developed independent of outside cultural influences and demonstrates that to the contrary the influence of the West extends back to the tenth century and continues into the present He offers compelling assessments of all the main masterpieces of Russian architecture and frames a radically new architectural history for Russia The book systematically analyzes Russian buildings in relation to developments in European art pointing out where familiar European features are expressed in Russian projects

Special attention is directed toward decorations based on Byzantine models the heritage of Italian master builders and carvers the impact of architects and others sent by Elizabeth I the formation of the Russian Imperial Baroque the Enlightenment in Russian art and 19th and 20th century European influences With over 300 specially commissioned photographs of sites throughout Russia and western Europe this magnificent book is both beautiful and groundbreaking

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1973 *Modern Architecture and the Sacred* Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West Painting and Sculpture in Europe, 1880-1940 George Heard Hamilton, 1993-01-01 This new edition of a book that offers the best available grounding in its huge subject as the Sunday Times called it includes color plates and a revised and expanded bibliography Professor Hamilton traces the origins and growth of modern art assessing the intrinsic qualities of individual works and describing the social forces in play The result is an authoritative guide through the forest of artistic labels Impressionism and Expressionism Symbolism Cubism Constructivism Surrealism etc and to the achievements of Degas and Cezanne Ensor and Munch Matisse and Kandinsky Picasso Braque and Epstein Mondrian Dali Modigliani Utrillo and Chagall Klee Henry Moore and many other artists in a revolutionary age *Wolkenbügel* Richard Anderson, 2024-04-09 How a visionary never realized architectural project devised by one of the twentieth century's greatest artists shaped architectural culture in Europe between the world wars After achieving international acclaim as a painter and designer El Lissitzky set out in 1924 to convince the world and himself that he was also an architect He did this with a project for a horizontal skyscraper which he gave an obscure and untranslatable name Wolkenbügel Eight of these buildings perched atop slender pillars were intended to stand at major intersections along Moscow's Boulevard Ring integrating the flow of tramlines subways and elevators In *Wolkenbügel* Richard Anderson explores Lissitzky's translation of visual and textual media into spatial ideas and offers an in depth study of the surviving drawings and archival artifacts related to Lissitzky's most complex architectural

proposal This book offers a new and definitive account of how Lissitzky expanded the conceptual and representational tools available to the modern architect by drawing on many sources including photography typography exhibition design and even the elementary forms of the alphabet to create the Wolkenb gel Anderson shows how the production and reception of a paper project served to link key ideas and relationships that animated the worlds of art and architecture offering a new view on received histories of the interwar avant gardes By attending to Lissitzky s singular architectural project Anderson reveals the dynamics of internationality in the constitution of modern architectural culture in Europe

The Architecture of Psychoanalysis Jane Rendell,2017-03-01 In this thought provoking book Jane Rendell explores how architectural space registers in psychoanalysis She investigates both the inherently spatial vocabulary of psychoanalysis and ideas around the physical setting of the psychoanalytic encounter with reference to Sigmund Freud D W Winnicott and Andre Green Building on the innovative writing methods employed in Art and Architecture and Site Writing she also addresses the concept of architecture as social condenser a Russian constructivist notion that connects material space and community relations Tracing this idea s progress from 1920s Moscow to 1950s Britain Rendell shows how interior and exterior meet in both psychoanalysis and architectural practice Illuminating a novel field of interdisciplinary enquiry this book breathes fresh life into notions of social space

Architecture of Life Alla Vronskaya,2022-08-23 Explores how Soviet architects reimaged the built environment through the principles of the human sciences During the 1920s and 1930s proponents of Soviet architecture looked to various principles within the human sciences in their efforts to formulate a methodological and theoretical basis for their modernist project Architecture of Life delves into the foundations of this transdisciplinary and transnational endeavor analyzing many facets of their radical approach and situating it within the context of other modernist movements that were developing concurrently across the globe Examining the theories advanced by El Lissitzky Moisei Ginzburg and Nikolay Ladovsky as well as those of their lesser known colleagues this illuminating study demonstrates how Soviet architects of the interwar period sought to mitigate Fordist production methods with other ostensibly more human oriented approaches that drew on the biological and psychological sciences Envisioning the built environment as innately connected to social evolution their methods incorporated aspects of psychoanalysis personality theory and studies in spatial perception all of which were integrated into an ideology that grounded functional design firmly within the attributes of the individual A comprehensive overview of the ideals that permeated its expanded project Architecture of Life explicates the underlying impulses that motivated Soviet modernism highlighting the deep interconnections among the ways in which it viewed all aspects of life both natural and manufactured

Museum Space Kali Tzortzi,2016-03-09 Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can

illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation **New**

Architecture and Technology Gyula Sebestyen, Christopher Pollington, 2007-06-07 Many books have covered the topics of architecture materials and technology New Architecture and Technology is the first to explore the interrelation between these three subjects It illustrates the impact of modern technology and materials on architecture The book explores the technical progress of building showing how developments both past and present are influenced by design methods It provides a survey of contemporary architecture as affected by construction technology It also explores aspects of building technology within the context of general industrial social and economic developments The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design *How Russia Shaped the Modern World* Steven G. Marks, 2020-11-10 In this sweeping history Steven Marks tells the fascinating story of how Russian figures ideas and movements changed our world in dramatic but often unattributed ways On Europe's periphery Russia was an early modernizing nation whose troubles stimulated intellectuals to develop radical and utopian alternatives to Western models of modernity These provocative ideas gave rise to cultural and political innovations that were exported and adopted worldwide Wherever there was discontent with modern existence or traditional societies were undergoing transformation anti Western sentiments arose Many people perceived the Russian soul as the antithesis of the capitalist imperialist West and turned to Russian ideas for inspiration and even salvation Steven Marks shows that in this turbulent atmosphere of the past century and a half Russia's lines of influence were many and reached far Russia gave the world new ways of writing novels It launched cutting edge trends in ballet theater and art that revolutionized contemporary cultural life The Russian anarchist movement benignly shaped the rise of vegetarianism and environmentalism while also giving birth to the violent methods of modern terrorist organizations Tolstoy's visions of nonviolent resistance inspired Gandhi and the U S Civil Rights movement at the same time that Russian anti Semitic conspiracy theories intoxicated right wing extremists the world over And dictators from Mussolini and Hitler to Mao and Saddam Hussein learned from the experiments of the Soviet regime Moving gracefully from Moscow and St Petersburg to Beijing and Berlin London and Luanda Mexico and Mississippi Marks takes us on an intellectual tour of the Russian exports that shaped the twentieth

century The result is a richly textured and stunningly original account of the extent to which Russia as an idea and a producer of ideas has contributed to the making of the modern world Placing Russia in its global context the book better our understanding of the anti Western strivings that have been such a prominent feature of recent history **Avant-Garde Film**,2015-07-14 This volume on avant garde film has emerged as part of a wider reassessment of 20th century avant garde art literature and film carried out in the framework of a research project at the University of Edinburgh It paves the way for a fresh assessment of avant garde film and develops its theory as an integral part of a newly defined conception of the avant garde as a whole by closing the gap between theoretical approaches towards the avant garde as defined on the basis of art and literature on the one hand and avant garde cinema on the other It gathers contributions by the most esteemed scholars in the field of avant garde studies relating to the classical avant garde cinema of the 1920s to new trends emerging in the 1950s and 1960s and to the impact that innovative technologies have recently had on the further development of avant garde and experimental film The contributions reflect the broad range of different moving image media that make up what we refer to today simply as film at the same time as reconsidering the applicability of the label avant garde to offer a comprehensive and updated framework that will prove invaluable to scholars of both Moving Image Studies and Art History disciplines

Modern Architecture Alan Colquhoun,2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition A History of Russian Painting Alan Bird,1987 This book provides the first comprehensive account of Russian and Soviet painting From the early icons down to the present day the author traces its fascinating and often turbulent history against a background of major historical events Cultural Planning Graeme Evans,2002-09-26 Cultural Planning is the first book on the planning of the arts and culture and the interaction between the state arts policy the cultural economy and town and city planning

The Aesthetics of Architecture Roger Scruton,2021-12-07 A landmark account of architectural theory and practice from acclaimed philosopher Roger Scruton Architecture is distinguished from other art forms by its sense of function its localized quality its technique its public and nonpersonal character and its continuity with the decorative arts In this important book Roger Scruton calls for a return to first principles in contemporary architectural theory contending that the aesthetic of architecture is in its very essence an aesthetic of everyday life Aesthetic understanding is inseparable from a sense of detail and style from which the appropriate the expressive the beautiful and the proportionate take their meaning Scruton provides incisive critiques of the romantic functionalist and rationalist theories of design and of the Freudian Marxist and semiological approaches to aesthetic value In a new introduction Scruton discusses how his ideas

have developed since the book's original publication and he assesses the continuing relevance of his argument for the twenty-first century

Avant Garde Film Alexander Graf, Dietrich Scheunemann, 2007 This volume on avant garde film has emerged as part of a wider reassessment of 20th century avant garde art literature and film carried out in the framework of a research project at the University of Edinburgh It paves the way for a fresh assessment of avant garde film and develops its theory as an integral part of a newly defined conception of the avant garde as a whole by closing the gap between theoretical approaches towards the avant garde as defined on the basis of art and literature on the one hand and avant garde cinema on the other It gathers contributions by the most esteemed scholars in the field of avant garde studies relating to the classical avant garde cinema of the 1920s to new trends emerging in the 1950s and 1960s and to the impact that innovative technologies have recently had on the further development of avant garde and experimental film The contributions reflect the broad range of different moving image media that make up what we refer to today simply as film at the same time as reconsidering the applicability of the label avant garde to offer a comprehensive and updated framework that will prove invaluable to scholars of both Moving Image Studies and Art History disciplines

Fields of View A.L. Rees, 2020-10-29 Drawing on film theory literary modernism psychology and art history *Fields of View* elucidates an expanded network of connections between avant garde film and wider culture In this bold and original work A L Rees identifies three key terms field frame and interval and charts their use by filmmakers and theorists such as Dziga Vertov Sergei Eisenstein Bruce Baillie Maya Deren Malcolm Le Grice and Werner Nekes from the 1920s through to the present day A seminal voice in film culture Rees left the incomplete manuscript for this book on his death and Simon Payne has subsequently carefully prepared the book for publication *Fields of View* is an important work that establishes a unique perspective on experimental film
