Designing Publics Christopher A. Le Dantec, 2016-09-16 An exploration of design considerations in the design of technologies that support local collective action Contemporary computing technologies have thoroughly embedded themselves in every aspect of modern life conducting commerce maintaining and extending our networks of friends and mobilizing political movements all occur through a growing collection of devices and services designed to keep and hold our attention Yet what happens when our attention needs to be more local collective and focused on our immediate communities Perhaps more important how can we imagine and create new technologies with local communities In *Designing Publics*

Christopher Le Dantec explores these questions by designing technologies with the urban homeless Drawing on a case study of the design of a computational infrastructure in a shelter for homeless women and their children Le Dantec theorizes an alternate vision of design in community contexts Focusing on collective action through design Le Dantec investigates the way design can draw people together on social issues and create and sustain a public By designing publics he refers both to the way publics arise out of design intervention and to the generative action publics take how they do design as they mobilize and act in the world This double lens offers a new view of how design and a diverse set of design practices circulate in sites of collective action rather than commercial production

The Design of Digital Democracy Gianluca Squeo, 2023-08-11 Ever stronger ties between technology entertainment and design are transforming our relationship with democratic decision making When we are online or when we use digital products and services we tend to focus more on certain factors like speed of service and user friendliness and to overlook the costs both for ourselves and others As a result a widening gap separates our expectations of everything related to digitalization including government and the actual practice of democratic governance Democratic regulators

unable to meet citizens demands for tangible fast and gratifying returns are seeing the poorest results ever recorded in terms of interest engagement and retention despite using the most cutting edge technologies This book explores various aspects of the relationship between democracy technology and entertainment These include on the one hand the role that digital technology has in strengthening our collective intelligence nurturing empathic relations between citizens and democratic institutions and supporting processes of political aggregation deliberation and collaboration On the other hand they comprise the challenges accompanying digital technology for representation transparency and inclusivity in democratic decision making The book s main argument is that digital democratic spaces should be redesigned to narrow the gap between the expectations and outcomes of democratic decision making It suggests abandoning the notion of digital participatory rights as being fast and easy to enjoy It also refutes the notion that digital democratic decision making can only be effective when it delivers rapid and successful responses to the issues of the day regardless of their complexity Ultimately the success or failure of digital democracy will depend on the ability of public regulators to design digital public spaces with a commitment to complexity so as to make them appealing but also effective at engaging citizens **Design Anthropology** Alison J.
