Making Difference World Seems Complex:

A Basic Theory of Everything Atle Ottesen Søvik, 2022-04-04 What are the basic building blocks of the world This book presents a naturalistic theory saying that the universe and everything in it can be reduced to three fundamental entities a field a set of values that can be actualized at different places in the field and an actualizer of the values The theory is defended by using it to answer the main questions in metaphysics such as What is causality existence laws of nature consciousness thinking free will time mathematical entities ethical values etc The theory is compared with the main alternatives and argued to solve problems better than the existing theories Several new theories are suggested such as how to understand mental causation free will and the truth of ethics and mathematics *Value Given, Value Received (2nd Edition)* Curtis Greco, 2010-03-26 VALUE GIVEN VALUE RECEIVED the second volume of the three part Blind Vision series is a critical extension of the fundamentals Curtis Greco presented in We Hold These Truths the introductory volume of this series Using the language and subject of economics and his own history this book grapples not only with the question What is freedom it also explores freedom's natural extension a citizen's personal industry Greco brings a fierce urgency to his thesis that far from being dreadfully tedious or boring economics and money are in reality intensely personal and relevant issues Among the subjects covered are simple economics monetary policy the practice of money including the dangers of a fiat money system prospects and proposals for the future and a lively discussion of the virtues of an old fashioned gold silver standard As in We Hold These Truths every position Greco advances draws from the fundamental principles upon which America was founded

Husserl and Intentionality D.W Smith, R. McIntyre, 2012-12-06 This book has roots in our respective doctoral dissertations both completed in 1970 at Stanford under the tutelage of Professors Dagfinn Føllesdal John D Goheen and Jaakko Hintikka In the fall of 1970 we wrote a joint article that proved to be a prolegomenon to the present work our Intentionality via Intentions The Journal of Philosophy 68 1971 Professor Hintikka then suggested we write a joint book and in the spring of 1971 we began writing the present work The project was to last ten years as our conception of the project continued to grow at each stage Our intellectual debts follow the history of our project During our dissertation days at Stanford we joined with fellow doctoral candidates John Lad and Michael Sukale and Professors Føllesdal Goheen and Hintikka in an informal seminar on phenomenology that met weekly from June of 1969 through March of 1970 During the summers of 1973 and 1974 we regrouped in another informal seminar on phenomenology meeting weekly at Stanford and sometimes Berkeley the regular participants being ourselves Hubert Dreyfus Dagfinn Føllesdal Jane Lipsky McIntyre Izchak Miller and in 1974 John Haugeland

The Invisible Wounds of War Marguerite Guzman Bouvard, 2012 The lingering impact of the longest wars in our nation's history is examined in this thoughtful work based on numerous interviews with veterans of Iraq and Afghanistan and their families

Sustainability for Whom? Hanna Sjögren, 2016-04-26 Global initiatives regarding environmental change have increasingly become part of political agendas and of our collective

imagination In order to form sustainable societies education is considered crucial by organizations such as the United Nations and the European Union But how is the notion of sustainability imagined and formed in educational practices What does sustainability make possible and whom does it involve These critical questions are not often asked in educational research on sustainability This study suggests that the absence of critical questions in sustainability education is part of a contemporary post political framing of environmental issues In order to re politicize sustainability in education this study critically explores how education as an institution and a practice that is supposed to foster humans responds to environmental change The aim is to explore how sustainability is formed in education and to discuss how these formations relate to ideas of what education is and whom it is for This interdisciplinary study uses theories and concepts from cultural studies feminist theory political theory and philosophy of education to study imaginaries of the unknown nonhuman world in the context of education The focus of the empirical investigation is on teacher education in Sweden and more precisely on those responsible for teaching the future generations of teachers the teacher instructors With help from empirical findings from focus groups the study asks questions about the ontological political and ethical potential and risk of bringing the unknown Other into education Utbildning har globalt fått en central roll i strövanden efter att skapa hållbar utveckling Initiativ tagna av såväl Frenta Nationerna som Europeiska Unionen driver utbildning och hållbarhet kopplas samman vittnar om att frgor som rör miljöförändringar har blivit allt viktigare både på politiska agendorna och i våra kollektiva kulturella föreställningsvärldar Men hur formas begreppet hållbar utveckling när det ska göras undervisningsbart Vilka framtider möjliggör hållbar utveckling i utbildningssammanhang och vem inkluderas i begreppet Frgor av kritisk karaktär ofta förknippade i tidigare utbildningsforskning som rör hållbar utveckling Denna avhandling tar sin utgångspunkt i att förnär av kritiska frgor kan ses som del i en samtida postpolitisk inramning av miljöförgor i såväl utbildningssammanhang som i samhället i stort Studien undersöker hur utbildningsväsendet som är en central institution i förstrandet av framtidens medborgare tar sig an frgor som rör miljöförändringar Syftet med studien är att undersöka hur hållbar utveckling formas genom utbildning samt att diskutera hur dessa formationer relateras till ider om vad utbildning är och vem som ska utbildas Påvisar studien också eftersträtt att repolitiserar hållbar utveckling i utbildningssammanhang Avhandlingen är tvärvetenskaplig och använder teorier och begrepp från kulturstudier feministisk teori politisk teori och utbildningsfilosofi för att studera vad utbildning som relaterar till natur och miljöförgor möjliggör Empiriskt undersöks svenska lärarutbildare som ansvarar för att utbilda framtidens lärare Studien ställer frgor om ontologiska politiska och etiska aspekter av att påna upp utbildningen för det som ligger bortom mänsklig kontroll och kunskap

The Development of Modern Logic Leila Haaparanta, 2009-06-18 This edited volume presents a comprehensive history of modern logic from the Middle Ages through the end of the twentieth century In addition to a history of symbolic logic the contributors also examine developments in the philosophy of logic and philosophical logic in modern times The book begins with chapters on late medieval developments and logic and philosophy of logic from

Humanism to Kant The following chapters focus on the emergence of symbolic logic with special emphasis on the relations between logic and mathematics on the one hand and on logic and philosophy on the other This discussion is completed by a chapter on the themes of judgment and inference from 1837 1936 The volume contains a section on the development of mathematical logic from 1900 1935 followed by a section on main trends in mathematical logic after the 1930s The volume goes on to discuss modal logic from Kant till the late twentieth century and logic and semantics in the twentieth century the philosophy of alternative logics the philosophical aspects of inductive logic the relations between logic and linguistics in the twentieth century the relationship between logic and artificial intelligence and ends with a presentation of the main schools of Indian logic The Development of Modern Logic includes many prominent philosophers from around the world who work in the philosophy and history of mathematics and logic who not only survey developments in a given period or area but also seek to make new contributions to contemporary research in the field It is the first volume to discuss the field with this breadth of coverage and depth and will appeal to scholars and students of logic and its philosophy **Working Through**

Synthetic Worlds Kenneth W. Kisiel, 2018-04-17 Virtual environments VE are human computer interfaces in which the computer creates a sensory immersing environment that interactively responds to and is controlled by the behaviour of the user Since these technologies will continue to become more reliable more resolute and more affordable it s important to consider the advantages that VEs may offer to support business processes The term synthetic world refers to a subset of VEs having a large virtual landscape and a set of rules that govern the interactions among participants Currently the primary motivators for participation in these synthetic worlds appear to be fun and novelty As the novelty wears off synthetic worlds will need to demonstrate a favourable value proposition if they are to survive In particular non game oriented worlds will need to facilitate business processes to a degree that exceeds their substantial costs for development and maintenance Working Through Synthetic Worlds explores a variety of different tasks that might benefit by being performed within a synthetic world The editors use a distinctive format for the book consisting of a set of chapters composed of three parts a story or vignette that describes work conducted within a synthetic world based loosely on the question what will work be like in the year 2025 founded on the expert authors expectations of plausible future technologies a scholarly review of the technologies described by the stories and the current theories related to those technologies a prescription for future research required to bridge the current state of the art with the notional worlds described in the stories The book will appeal to undergraduate and graduate students professors scientists and engineers managers in high tech industries and software developers **Global Justice and Recognition Theory** Monica Mookherjee, 2023-06-16 In the light of intense international focus on ongoing forms of world poverty this book examines the potential of the concept of recognition in contemporary political philosophy to respond morally to this dire condition This book uses recognition theories to develop a two tiered response to the problem of global poverty First it highlights non degradation non humiliation and the avoidance of social

suffering as essential components to the agency of the very poor This runs counter to liberal arguments that focus only on the deficit of basic material interests Second even if universal conditions of agency are met many of the world s extreme poor may still suffer domination The book argues that empowering the world s poor to resist domination is an essential response to global poverty By conceiving poverty in terms of agency and empowerment this book highlights the transnational relevance of recognition theory to one of the most crucial problems affecting a rapidly globalising world Global Justice and Recognition Theory will be of interest to scholars and advanced students working in social and political philosophy political theory and global justice
