The Myth of Development Oswaldo De Rivero,2013-04-04 The message of this courageous classic book is that the benefits of development so long promised over the past sixty years have not come about for most people Nor are they going to State driven and market led development models have both failed Many countries and their cities in particular are collapsing into ungovernable chaotic entities under the control of warlords and mafias Oswaldo de Rivero argues that the wealth of nations agenda must be replaced by a survival of nations agenda In order to prevent increasing human misery and political disorder many countries must abandon dreams of development and adopt instead a policy of national survival based on providing basic water food and energy and stabilizing their populations This much anticipated new edition features both updated statistics and fresh material including an essential new argument that the present global crisis is not simply economic but a much more profound crisis of the California Model a crisis of our way of life and of our unsustainable global urban civilization

Ecology and Justice—Citizenship in Biotic Communities David R. Keller,2019-03-30 This is the first book to outline a basic philosophy of ecology using the standard categories of academic philosophy metaphysics axiology epistemology aesthetics ethics and political philosophy The problems of global justice invariably involve ecological factors Yet the science of ecology is itself imbued with philosophical questions Therefore studies in ecological justice the sub discipline of global justice that relates to the interaction of human and natural systems should be preceded by the study of the philosophy of ecology This book enables the reader to access a philosophy of ecology and shows how this philosophy is inherently normative and provides tools for securing ecological justice The moral philosophy of ecology directly addresses the root cause of ecological and environmental injustice the violation of fundamental human rights caused by the inequitable distribution of the benefits economies and costs diseconomies of industrialism Philosophy of ecology thus has implications for human rights pollution poverty unequal access to resources sustainability consumerism land use biodiversity industrialization energy policy and other issues of social and global justice This book offers an historical and interdisciplinary exegesis The analysis is situated in the context of the Western intellectual tradition and includes great thinkers in the history of ecological thinking in the West from the natural sciences social sciences and humanities Keller asks the big questions and surveys answers with remarkable detail Here is an insightful analysis of contemporary classical and ancient thought alike in the ecological sciences the humanities and economics the roots and fruits of our concepts of nature and of being in the world Keller is unexcelled in bridging the is ought gap bridging nature and culture and in celebrating the richness of life its pattern

Mill perhaps the only philosopher in this volume to evade Kant's influence. Also included are works by two post-Kantian idealists, Fichte and Hegel, as well as Schopenhauer, Kierkegaard, Marx, and Nietzsche. Contributors include Curtis Bowman, Stephen Evans, Michelle Grier, Michael Inwood, Dale Jacquette, Jonathan Riley, Tom Rockmore, and Rex Welshon.

Genetic Resources as Natural Information Manuel Ruiz Muller, 2015-09-16. Demonstrating the shortcomings of current policy and legal approaches to access and benefit sharing (ABS) in the Convention on Biological Diversity (CBD), this book recognizes that genetic resources are widely distributed across countries and that bilateral contracts undermine fairness and equity. The book offers a practical and feasible regulatory alternative to ensure the goal of fairness and equity is effectively and efficiently met. Through a legal analysis that also incorporates historic economic and sociological perspectives, the book argues that genetic resources are not tangible resources but information. It shows that the existing preference for bilateralism and contracts reflects resistance on the part of many of the stakeholders involved in the CBD process to recognize them as such. ABS issues respond very well to the economics of information, yet as the author explains, these have been either sidelined or overlooked. At a time when the Nagoya Protocol on ABS has renewed interest in feasible policy options, the author provides a constructive and provocative critique. The institutional policy and regulatory framework constitute bounded openness under which fairness and equity emerge.
