# MASTER CHIEF

## MASTER CHIEF PETTY OFFICER JOHN-117

Conscripted into the SPARTAN-II program as a child, the boy named John would be physically augmented and encased in Mjolnir battle armor, ultimately becoming the Master Chief. For three decades, this Spartan would battle against the Covenant, eventually making the critical discovery of Halo and tipping the scales in humanity's favor. But in the aftermath of the war, the Chief would find the human race threatened by another force – an ancient Forerunner known as the Didact. Although the Spartan would prevail, this conflict would not come without a loss: Cortana, the Chief's artificial construct and ally, would perish in battle.

# CORTANA

## CTN 0452-9

Created from the mind of Dr. Catherine Halsey, Cortana is a unique AI construct, as she was designed using the neural pathways of a living human. In 2552, she was paired with the Master Chief for Operation: RED FLAG, but the sudden fall of the planet Reach would set the two on a collision course with Halo. The discovery of this ancient ringworld would not only bring victory in the war against the Covenant, but it would also lead to the reemergence of the Didact – an ancient Forerunner with a vicious hatred of humanity. During a battle aboard the Didact's ship, Cortana would ultimately perish, sacrificing her life to stop this new enemy.
Cortana suffered from rampancy, a volatile state of instability brought on when an AI reaches seven years of service.
