Spiller, 2020-08-11 The Handbook of Lipids in Human Nutrition is a concise reference for professionals and students interested in the role of lipids in nutrition Over 100 tables and illustrations provide quick access to the most current data The Low-Fat Lie Glen D. Lawrence, 2019-11-15 The advice to consume less fat especially saturated fat had a available profound adverse impact on public health Although the percentage of fat in the American diet decreased the percentage of carbohydrate and total calories increased and sugar consumption skyrocketed In The Low Fat Lie Rise of Obesity Diabetes and Inflammation Dr Glen Lawrence describes how the false condemnation of saturated fat arose from a misunderstanding of how our bodies regulate cholesterol He explains how replacing saturated fat with vegetable oil stoked the fires of inflammation to cause pain and suffering in addition to aggravating cancer diabetes and heart disease The mainstream health and nutrition authorities have long cautioned against consuming too much sugar because of the risk of tooth decay However they refuse to indict sugar for the gross deterioration of the nation s health and continue to blame fat especially saturated fat

Dr Lawrence points out that a low fat high carbohydrate diet is not as effective as a low carbohydrate diet for long term weight loss yet the low fat diet mantra continues to resonate from the halls of the agencies doling out dietary advice He also describes how sugar consumption produces classic signs of addiction in lab animals whereas high fat consumption does not The food and beverage industries take advantage of this phenomenon and use aggressive marketing strategies to get children hooked on sugar at an early age Understanding how we process what we put into our body can inform our decisions regarding dietary choices and a healthy lifestyle Consuming more fiber in fruits and vegetables promotes a healthy microbiome which is critical to overall health The Low Fat Lie also discusses many ways in which gut microbiota communicate with fat tissue and other organs including via endocannabinoid signals active components of cannabis in the context of inflammation and pain and how stress can influence eating patterns while exercise can help relieve stress and suppress or control detrimental eating behaviors Dr Lawrence does not prescribe any specific diet plan Instead he aims to enlighten the reader by illustrating the dire consequences of excessively sweetened and highly processed foods
