Haynes Tiger Tank Manual:

T-34 Tank Owners' Workshop Manual Mark Healy, 2018-02-06 The Soviet T 34 was one of the finest tanks of the Second World War and the mainstay of Soviet armoured units throughout the war Most nations underestimated the scale and quality of Soviet tank production before the Second World War and the Germans were no exception They were certainly not prepared for the T 34 which they encountered during Operation Barbarossa the German invasion of Russia in 1941 Its combination of firepower mobility protection and ruggedness led German Panzer General Paul von Kleist at the time to call it The finest tank in the world Another legendary Panzer tactician and general Heinz Guderian also confirmed the T 34 s vast superiority over existing German armour of the period

Tiger Tank Manual David Fletcher, 2011-07-15 The German Tiger I officially known as the Panzerkampfwagen VI Tiger I Auchs E Skiffs 181 was probably the most feared battle tank of World War II Its invincibility lay in its main gun and heavy defensive armor The Tiger s primary armament was the deadly 88mm Kiwi 36 L 56 gun that was the most powerful antitank gun then in use by any army capable of penetrating 112mm of armor plate from a range of 1400 meters The Tiger I also had the toughest armor of any German tank its frontal armor plate measured 100mm thick Using the successful approach and format adopted for the Spitfire and Lancaster manuals Tiger Tank Manual gives an insight into acquiring owning and operating one of these awesome fighting vehicles It also gives an idea through personal recollections of what it was like to command a Tiger in war and what it felt like to be on the receiving end of its 88mm gun

Tiger I & Tiger II Anthony Tucker-Jones, 2013-07-17 A pictorial history and analysis of the infamous World War II German tanks The German Tiger I and Tiger II known to the Allies as the King Tiger or Royal Tiger were the most famous and formidable heavy tanks of the Second World War In their day their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked Anthony Tucker Jones in this illustrated history tells the story of their conception and development and reconsiders their operational history and he dispels the myths that have grown up around them The Tigers were over engineered required raw materials that were in short supply and were time consuming to manufacture and difficult to recover from the battlefield Only around 1 300 of the Tiger I and fewer than 500 of the Tiger II were produced so they were never going to make anything more than a local impact on the outcome of the fighting on the Western and Eastern fronts Yet the myth of the Tigers with their 88mm guns thick armor and brutal profiles has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War Anthony Tucker Jones s expert account of these remarkable fighting vehicles is accompanied by a series of color plates showing the main variants of the designs and the common ancillary equipment and unit markings His book is an essential work of reference for enthusiasts

Tiger Tank David Fletcher, David Willey, 2020-02-18 The German Tiger I was the most feared battle tank of the Second World War Its invincibility lay in its main 8 8cm gun and heavy defensive armour Tiger Tank gives a rare insight into acquiring owning and operating one of

these awesome fighting machines using the UK's Tank Museum's Tiger 131 the only Tiger I in the world that has been restored to full running order In addition to offering unique insights into maintenance and driving the Tiger the book includes vivid personal recollections from wartime German tank crewmen and reveals what it was like to operate this 57 ton giant in combat It was written by a team of experts from the Tank Museum who were closely involved with the strip down and rebuild of the Tiger I David Fletcher is a historian a prolific author and a world expert on tanks David Willey is a curator and Mike Hayton is workshop manager Other members of the writing team include volunteers Darren Hayton and Steven Vase Mike Gibb of the SdKfz Military Vehicle Foundation and David Schofield a specialist in forensic science **Great War Tank**

David Fletcher,2013-07-01 The world's first ever battle tank receives the Haynes Manual treatment and its centrepiece is the most prolific British tank of the Great War the Tank Mk IV World authority David Fletcher looks at the anatomy construction and operation of the Mk IV including rare contemporary eyewitness descriptions as well as giving fascinating insights into the maintenance and restoration of these historic armoured fighting vehicles Individual preserved Great War tanks that feature in the manual include Flirt II the Ashford Tank Lodestar III Excellent and Deborah **Tank Gun Systems** William

Andrews,2023-06-30 Much has been written about the use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system **TANKER**
