

Multidisciplinary Approaches to Head and Neck Cancer Care

Insights into Optimizing Care Coordination and Quality

Head and neck cancers account for approximately 4% of all cancers in the United States. Squamous cell carcinomas that develop in or around the mouth, pharynx, larynx, nose, sinuses, and salivary glands are collectively referred to as head and neck cancers. Among these, oral, pharyngeal, and laryngeal cancers are the most commonly diagnosed forms.

Advances in treatment and the use of a multimodal approach (that may include surgery, radiation therapy, systemic therapy with chemotherapy, targeted therapy, or immunotherapy) are improving outcomes, however access to therapies and effective multimodal care coordination remain challenging.

Identifying Care Gaps in Head and Neck Cancer

Through patient and provider surveys, focus group discussions, and a multistakeholder roundtable—conducted by the Association of Cancer Care Centers (ACCC) in partnership with the American Society for Radiation Oncology and the Head and Neck Cancer Alliance—critical challenges were identified and strategic opportunities for improving patient care and support emerged. By expanding upon these opportunities, ACCC and its partners can work to elevate the standard of care for patients with head and neck cancer in a variety of practice settings.

Challenges and Key Opportunities

Diagnostic Delays

Challenge	Potential Solutions
Patients with head and neck cancer often experience delays in diagnosis due to a lack of awareness of symptoms, limited access to specialists, and fragmented care pathways.	 Education for Primary Care Providers and Dentists: Enhance education and awareness to improve early detection and referral.
	 Mobile Diagnostic Units: Deploy mobile units equipped with diagnostic tools to reach underserved and rural communities. May focus on high-risk individuals or in conjunction with other cancer screening efforts.
	 Fast-Track Diagnostic Pathways: Establish streamlined pathways for patients with suspicious findings to receive timely diagnostic workups.
