Diagnosis Narratives and the Healing Ritual in Western Medicine James Meza, 2018-07-17 The dominance of illness narratives in narrative healing studies has tended to mean that the focus centers around the healing of the individual Meza proposes that this emphasis is misplaced and the true focus of cultural healing should lie in managing the disruption of disease and death cultural or biological to the individual s relationship with society By explicating narrative theory through the lens of cognitive anthropology Meza reframes the epistemology of narrative and healing moving it from relativism to a philosophical perspective of pragmatic realism Using a novel combination of narrative theory and cognitive anthropology to represent the ethnographic data Meza s ethnography is a valuable contribution in a field where ethnographic records related to medical clinical encounters are scarce The book will be of interest to scholars of medical anthropology and those interested in narrative history and narrative medicine
