House of Commons - Health Committee: After Francis: Making A Difference - HC 657 Great Britain: Parliament: House of Commons: Health Committee,2013-09-18 The NHS needs to be an organization in which an open dialogue about care quality is part of the natural culture of the organization not a duty which only arises in cases of service failure Robert Francis made 290 recommendations in his report but in truth they boil down to just one that the culture of doing the system s business is pervasive in parts of the NHS and has to change Many who raise their concerns in the NHS at present risk serious consequences for their employment and professional status But disciplinary procedures professional conduct hearings and employment tribunals are not the proper place for honestly held concerns about patient safety and care quality to be aired constructively The NHS standard contract imposes a duty of candour on all NHS providers This is an essential principle but it is not adequately understood or applied It should mean that all providers create a culture which is routinely open both with their patients and their commissioners The same principle should apply to commissioners so that they are routinely open and accountable to local communities The Health Committee recommended this approach in 2011 and repeats that now It should be a prime role of the CQC to encourage the development of this culture within care providers and of NHS England to develop the same culture within commissioners The Health Committee will in future work closely with the Professional Standards Authority to develop the accountability process for professional regulators in healthcare **Dementia in Prison** Joanne Brooke,2020-12-06 This innovative volume exposes dementia as a condition that the aging prison population is increasingly facing Going beyond exploring the need to understand dementia within prison populations it argues that healthcare workers and prison staff must ensure that prisoners developing dementia during their sentence are identified and supported Dementia in Prison covers three key areas Healthcare services in prison settings and how these affect the rapidly aging prison population The human rights of prisoners with dementia alongside the ethics of healthcare in this environment The current state of support for prisoners with dementia and any recommendations for future assessment diagnosis and

policies This provocative book will be invaluable to scholars in the fields of public health criminology and medical sociology as well as nurses and prison staff **How Do You Get Clinicians Involved in Quality Improvement?** Tom Ling,2010
